B.Sc NURSING CURRICULUM
Tomorrow’s world will be shaped by today’s children. In their tender minds, it is easy to cultivate universal human values. If you walk through a field of soft, green grass a few times; you will quickly make a path; whereas it takes countless trips to forge a trial on a rocky hillside. Teaching of universal spiritual principles and human values should be standard part of the general education, not only the responsibility of the family. This should not be delayed by further, for if there is delay, the future generations will be lost to the world.

_Sri Mata Amritanandamayi Devi, “Living in Harmony”_

B. Sc NURSING CURRICULUM
(From 2010 Admission)

Bachelor of Science in Nursing [B. Sc Nursing] programme at AMRITA VISHWA VIDYAPEETHAM (Deemed University) is four-year degree course.

Philosophy

INC believes that:

Health is a state of well-being that enables a person to lead a psychologically, socially and economically productive life. Health is a right of all the people. Individuals, families and communities have a responsibility towards maintaining their health.

Nursing contributes to the health services in a vital and significant way in the health care delivery system. It recognizes national health goals and is committed to participate in the implementation of National Health policies and programmes. It aims at identifying health needs of the people, planning and providing quality care in collaboration with other health professionals and community groups.

Scope of nursing practice encompasses provision of promotive, preventive, curative and rehabilitative aspects of care to people across their life span in wide variety of health care settings. Practice of nursing is based upon application of basic concepts and principles derived from the physical, biological and behavioral sciences, medicine and nursing.

Nursing is based on values of caring, and aims to help individuals to attain independence in self-care. It necessitates development of compassion and understanding of human behavior among its practitioners to provide care with respect and dignity and protect the rights of individuals and groups.

Undergraduate nursing program is broad based education within an academic framework specifically directed to the development of critical thinking skills, competencies and standards required for practice of professional nursing and midwifery as envisaged in National Health Policy 2002.

The teachers have the responsibility to be role models and create learning environment that enables students to acquire inquiry driven, self directed learning and foster an attitude of life long learning.

Under graduate nursing education program prepares its graduates to become exemplary citizen by adhering to code of ethics and professional conduct at all times in fulfilling personal, social and professional obligations so as to respond to national aspirations.
Aim

The aim of the undergraduate nursing program is to:

- Prepare graduates to assume responsibilities as professional, competent nurses and midwives in providing promotive, preventive, curative, and rehabilitative services.
- Prepare nurses who can make independent decisions in nursing situations, protect the rights of and facilitate individuals and groups in pursuit of health, function in the hospital, community-nursing services and conduct research studies in the areas of nursing practice. They are also expected to assume the role of teacher, supervisor and manager in a clinical/public health setting.

Objectives

On completion of the four year B.Sc Nursing program the graduate will be able to:

1. Apply knowledge from physical, biological and behavioral sciences, medicine including alternative systems and nursing in providing nursing care to individuals, families and communities.
2. Demonstrate understanding of life style and other factors, which affect health of individuals and groups.
3. Provide nursing care based on steps of nursing process in collaboration with the individuals and groups.
4. Demonstrate critical thinking skill in making decisions in all situations in order to provide quality care.
5. Utilize the latest trends and technology in providing health care.
6. Provide promotive, preventive and restorative health services in line with the National Health Policies and programmes.
7. Practice within the framework of code of ethics and professional conduct, and acceptable standards of practice within the legal boundaries.
8. Communicate effectively with individuals and groups, and members of the health team in order to promote effective interpersonal relationships and teamwork.
9. Demonstrate skills in teaching to individuals and groups in clinical/community health settings.
10. Participate effectively as members of the health team in health care delivery system.
11. Demonstrate leadership and managerial skills in clinical/community health settings.
12. Conduct need based research studies in various settings and utilize the research findings to improve the quality of care.
13. Demonstrate awareness, interest and contribute towards advancement of self and of the profession.
14. Demonstrate personal characteristics and attitudes (like personal integrity, responsibility, reliability and showing concern for other individuals) required for professional life.
Title of the Course: B.Sc. Nursing

REGULATIONS RELATING TO B Sc. NURSING PROGRAMME

Eligibility for admission

1. The candidate should have completed 17 years of age on or before 31st December of the year of admission but should not have completed the age of 25 years in the year of admission.
2. The minimum educational requirement shall be passing of:
   Higher Secondary School Certificate Examination (12 years course)
   Or
   Senior School Certificate Examination (10 +2), Pre-Degree Examination (10 +2)
   Or
   An equivalent with 12 years schooling from a recognized Board or University in the first attempt with an aggregate of 60% in Science (Physics, Chemistry, and Biology) and 50% in English.
3. Candidate shall be medically fit.

Criteria for selection of the candidates

Selection of the candidate is based on the Common Entrance Test conducted by the AMRITA Vishwa Vidyapeetham University.

Duration

Duration of the course : 4 years
Weeks available per year : 52 Weeks
Vacation/holidays : 7 weeks (4 weeks vacation plus 3 weeks calendar holidays)
Examination (including preparatory) : 4 weeks
Extra curricular activities : 2 weeks
Weeks available : 39 weeks
Hours per week : 40 hours
Hours available per academic year : 1560 (39 weeks x 40 hours)

Attendance

1. A candidate must have a minimum of 80% attendance (irrespective of the kind of absence) in theory and practical separately in each subject to be eligible to appear for the University Examination. However, the students should have 100% attendance in each of the practical areas before admitting to the next year.
2. Maximum of 5% may be condoned by the University on a genuine reason.
3. A candidate, who is absent for a period of 60 days or more continuously within a period of three months during an academic year, shall not be eligible to continue the course with the same batch of students.
Internal assessment

1. Regular periodic assessment shall be conducted throughout the course. At least three sessional examinations in theory and preferably two practical examinations should be conducted in each subject. The model examination should be of the same pattern of the University Examination. Average of the three examinations and the marks obtained in assignments also shall be taken to calculate the internal assessment.
2. A candidate should secure a minimum of 35% mark in the internal assessment in each subject (separately in theory and practical) to be eligible to appear for the University examination.
3. The candidate shall submit a record of the clinical work done in that year duly attested by the Principal of College of Nursing.
4. The internal assessment marks shall be submitted to the University 10 days prior to the commencement of the University Examinations.

Examination

1. University Examination shall be conducted twice in a year at an interval of five to six months as specified by the University.
2. A candidate who satisfies the requirement of attendance, internal assessment marks, as stipulated by the University shall be eligible to appear for the University Examination.
3. A candidate who has undergone the prescribed course of study for a period of not less than 10 (ten) months of the academic year only can appear for the examination.
4. Candidate should score a minimum of 40% marks in theory and practical separately in each subject for university examination.
5. The minimum pass for internal assessment is 35% and for the University examination is 40%. However, the student should score a total of 50% (adding the internal and external examination) to pass, in each subject (separately for theory and practical).
6. If a candidate fails in either theory or practical paper, he/she has to re-appear for both the papers (theory and practical).
7. Maximum number of attempts permitted for each paper is five including the first attempt.
8. Candidate shall not be admitted to the subsequent higher examination unless he/she has passed the previous examination.
9. The maximum period to complete the course shall not exceed 8 years.
10. All practical examinations should be conducted in the respective clinical areas.
11. Number of candidates for practical examination should be maximum 12 to 15 per day.
12. One internal and external examiner should jointly conduct the practical examination for each student.
13. An examiner in the nursing subject should be an Assistant Professor or above in a College of Nursing with M.Sc Nursing in the concerned subject and must have minimum of three years of teaching experience. To be an examiner in Foundations of Nursing, M.Sc faculty in any specialty with three years of teaching shall be considered.
Evaluation and grade
1. Minimum mark for pass shall be 50% in each of the theory and practical papers separately (including internal assessment) in all subjects except English. Only a minimum of 40% is required to pass in English.
2. A candidate who passes the examination in all subjects with an aggregate of 50% marks and above and less than 65% shall be declared to have passed the examination in the second class.
3. A candidate who passes the examination in all subjects in the first attempt obtaining not less than 65% of the aggregate marks for all the four years shall be declared to have passed the examination with First class.
4. A candidate who secures an aggregate of 75% or above marks is awarded distinction. A candidate who secures not less than 75% marks in any subject will be deemed to have passed the subject with distinction in that subject provided he/she passes the whole examination in the first attempt.
5. A candidate who passes the examination in subsequent appearance shall be ranked only in Second Class.
6. Rank in the examination: - Aggregate marks of all four year regular examinations have been considered for awarding rank for the B.Sc Nursing Examination (A consolidated mark list consisting of marks of all four year examination shall be given to all the students).

# ANATOMY AND HISTOLOGY

**Placement:** First year  
**Time:** Theory – 80 hours  
Practical (Lab) – 20 hours

**Course Description:** The course is designed to enable students to acquire knowledge of the normal structure of various human body systems and understand the alterations in anatomical structures in disease and apply this knowledge in the various practice of nursing.

- Demonstrate cells, types of tissues, Membranes and glands | o Short answers  
- Objective type |
| II   | 10         | Describe the structure & function of bones and joints | **The Skeletal System**  
- Bones- types, structure, axial & appendicular skeleton  
- Bone formation and growth  
- Description of bones  
- Joints: classification and structure  
- Applications and implications in nursing | o Lecture cum discussion  
- Explain using charts, skeleton, loose bones, and joints | o Short answers  
- Objective type |
| III  | 8          | Describe the structure and function of muscles | **The Muscular System**  
- Types and structure of muscles  
- Muscle groups  
- Alterations in disease  
- Applications and implications in nursing | o Lecture cum discussion  
- Explain using charts, models and films  
- Demonstrate muscular movements | o Short answers  
- Objective type |

| I    | 5          | Describe muscle tone | **General Physiology & Nerve: Muscle Physiology**  
- General Physiology: introduction to terminology: cells, tissues, organs, organ systems etc  
- Nerve: structure of a typical neuron and classification of nerve fibres  
- Resting membrane potential & action potential  
- Nerve conduction  
- Degeneration & regeneration  
- Neuromuscular transmission & drugs acting on N - M junction  
- Muscles: Types, sarcomere, molecular mechanism of muscle contraction. | ○ Lecture discussion  
○ Explain using charts, models slides, specimen and films | ○ Short answer  
○ Objective type |

Demonstrate muscle contraction and tone

| II   | 10         | Describe the physiology of blood | **Hematology System**  
- Body fluid compartments, blood, composition & functions, plasma proteins,  
- Lymph & tissue fluid.  
- RBC formation, fate, ESR, PCV  
- Hemoglobin: structure, synthesis & breakdown.  
- Estimation of HB  
- Anaemia, polycythaemia | ○ Lecture cum discussion  
○ Explain using Charts, films  
○ Demonstration of Blood cell count, coagulation, grouping, Haemoglobin estimation, | ○ Short answer  
○ Objective type |

Demonstrate blood cell count, coagulation, grouping, Hb,

### Functions of large intestine
- Functions of liver and gall bladder
- Movements of GIT.
- Disorders: Paralytic ileus, Constipation, diarrhoea

### Endocrine System
- Hormones of hypothalamus, pituitary, thyroid, parathyroid, pancreas, suprarenal
- Applied aspects
- Lecture discussion
- Explain using charts, films
- Short answer
- Objective type

### Special Senses
- Vision: physiological anatomy, visual pathway, retina, refractory errors
- Audition: physiological anatomy, functions of middle ear, organ of corti, pathway, hearing disorders
- Taste/smell: receptors, pathway
- Lecture discussion
- Explain using charts, films
- Short answer
- Objective type

### Reproductive System
- Introduction to terminology: mitosis, meiosis, spermatogenesis, oogenesis
- Female reproductive organs, menstrual cycle (ovarian & uterine cycle) ovulation and ovulation tests, functions of placenta, role of ovarian hormones in breast development, physiology of lactation
- Male reproductive organs, spermatogenesis & factors affecting it.
- Basis of contraception in males and females
- Applied aspects
- Lecture discussion
- Explain using charts, films, models, specimens
- Short answer questions
- Objective Type
Practicals:
1. Introduction to use & care of microscope - 1 hr
2. Demonstrate Haemoglobin, ESR, PCV, Blood coagulation, Peripheral blood smear & blood group - 1½ hrs
3. Demonstrate muscle tone, reflexes - ½ hr
4. Demonstrate BP measurement, auscultation of heart sounds & respiratory sounds –2 hr

**MICROBIOLOGY**

**Placement:** First year

**Time:** Theory- 60 Hours

*(Theory 45+15 lab)*

**Course Description:** This course is designed to enable students to acquire understanding of fundamentals of microbiology and identification of various microorganisms. It also provides opportunities for practicing infection control measures in hospital and community settings.

### Infection control
- Infection: sources, portals of entry and exit, transmission
- Asepsis
- Disinfection: types and methods
- Sterilization: types and methods
- Chemotherapy and antibodies
- Standard safety measures
- Biomedical waste management
- Role of Nurse
- Hospital acquired infection
- Hospital infection control programme
- Protocols, collection of samples, preparation of report and status of rate of infection in the unit/hospital, nurse’s accountability, continuing education etc.

### Pathogenic Organisms
- Micro-organisms
  - Cocci: gram positive and gram negative
  - Bacilli: gram positive and gram negative
  - Spirochaete
  - Mycoplasma
  - Rickettsiae
  - Chlamydiae
- Viruses
- Fungi: superficial and deep mycoses
- Parasites
- Rodents & vectors
- Characteristics, source, portal of entry, transmission of infection
- Identification of disease

### Methods of Teaching:
- Lecture
- Discussion
- Demonstration
- Visits to CSSD
- Clinical practice

### Evaluation:
- Short answers

| I    | 5          | Describe the relationship between nutrition & health | **Introduction**  
- Nutrition: history, concepts  
- Role of nutrition in maintaining health  
- Nutritional problems in India  
- National nutritional policy  
- Factors affecting food and nutrition: socioeconomic, cultural, tradition, production, system of distribution, life style and food habits etc  
- Role of food and its medicinal value  
- Classification of foods  
- Food standards  
- Elements of nutrition: macro and micro  
- Calorie, BMR |  
- Lecture cum discussion  
- Explain using charts  
- Panel discussion |  
- Short answer questions  
- Objective type |
| II   | 2          | Describe the classification, functions, sources and recommended daily allowances (RDA) of carbohydrates | **Carbohydrates**  
- Classification  
- Caloric value  
- Recommended daily allowances  
- Dietary sources  
- Functions  
- Digestion, absorption and storage, metabolism of carbohydrates  
- Malnutrition: deficiencies and over consumption |  
- Lecture cum discussion  
- Explaining using charts |  
- Short answers  
- Objective type |
| III  | 2 | Describe the classification, functions, sources and recommended daily allowances (RDA) of fats | **Fats**  
- Classification  
- Caloric value  
- Recommended daily allowances  
- Dietary sources  
- Functions  
- Digestion, absorption and storage, metabolism  
- Malnutrition: deficiencies and over consumption |  
- Lecture cum discussion  
- Explaining using charts |  
- Short answers  
- Objective type |
| IV   | 2 | Describe the classification, functions, sources and recommended daily allowances (RDA) of Proteins | **Proteins**  
- Classification  
- Caloric value  
- Recommended daily allowances  
- Dietary sources  
- Functions  
- Digestion, absorption, metabolism and storage  
- Malnutrition: deficiencies and over consumption |  
- Lecture cum discussion  
- Explaining using charts |  
- Short answers  
- Objective type |
| V    | 3 | Describe the daily calorie requirement for different categories of people | **Energy**  
- Unit of energy-Kcal  
- Energy requirements of different categories of people  
- Measurements of energy  
- Body Mass Index (BMI) and basic metabolism  
- Basal Metabolic Rate (BMR): determination and factors affecting |  
- Lecture cum discussion  
- Explaining using charts  
- Exercise  
- Demonstration |  
- Short answers  
- Objective type |
| VI   | 5 | Describe the classification, functions, sources and recommended daily allowances (RDA) of vitamins | **Vitamins**  
- Classification  
- Recommended daily allowances  
- Dietary sources  
- Functions  
- Absorption, synthesis, metabolism, storage and excretion  
- Deficiencies  
- Hypervitaminosis |  
- Lecture cum discussion  
- Explaining using charts |  
- Short answers  
- Objective type |
| VII | 5 | Describe the classification, functions, sources and recommended daily allowances (RDA) of minerals | **Minerals**
- Classification
- Recommended daily allowances
- Dietary sources
- Functions
- Absorption, synthesis, metabolism, storage and excretion
- Deficiencies
- Over consumption and toxicity | **Lecture cum discussion**
**Explaining using charts** | **Short answers**
**Objective type** |
| VIII | 4 | Describe the sources, functions and requirements of water & electrolytes | **Water & electrolytes**
- Water: daily requirement, regulation of water metabolism, distribution of body water
- Electrolytes: types, sources, composition of body fluids
- Maintenance of fluid & electrolyte balance
- Over hydration, dehydration and water intoxication
- Electrolyte imbalances | **Lecture cum discussion**
**Explaining using charts** | **Short answers**
**Objective type** |
| IX | 6 12 | Describe the cookery rules and preservation of nutrients | **Cookery rules and preservation of nutrition**
- Principles, methods of cooking and serving
- Preservation of nutrients, safe food handling – toxicity, storage of food, food preservation, food additives and its principles
- Prevention of Food Adulteration Act (PFA), food standards
- Preparation of simple beverages and different types of food | **Lecture**
**Discussion**
**Demonstration**
**Practice session** | **Short answers**
**Objective type** | **Assessment of practice sessions** |
| X | 7 | 3 | Describe and plan balanced diet for different categories of people | **Balanced diet**  
- Elements, food groups  
- Recommended Daily Allowance (RDA)  
- Nutritive value of foods  
- Calculation of balanced diet for different categories of people  
- Planning menu  
- Budgeting of food  
- Introduction to therapeutic diets: naturopathy diet | **Lecture**  
**Discussion**  
**Explaining using charts** | **Short answers**  
**Objective type** |
| XI | 4 | Describe various national programmes related to nutrition  
Describe the role of nurse in assessment of nutritional status and nutrition education | **Role of nurse in nutritional Programmes**  
- National programmes related to nutrition: Vitamin A deficiency programme, National Iodine Deficiency disorders, (IDD) programme, mid-day meal programme, Integrated child development scheme (ICDS)  
- National and International agencies working towards food/nutrition: NIPCCD, CARE, FAO, NIN, CFTRI (Central food technology and research institute) etc  
- Assessment of nutritional status  
- Nutritional education and role of nurse | **Lecture**  
**Discussion**  
**Explaining with Slide/film shows**  
**Demonstration of assessment of nutritional status** | **Short answers**  
**Objective type** |

| B.Sc Nursing Curriculum |

| V | 7 | Explain the concepts of personality and its influence on behaviour |
|   |   | **Personality**  |
|   |   | - Definitions, topography, types, theories  |
|   |   | - Psychometric assessments of personality  |
|   |   | - Characteristics of a healthy personality  |
|   |   | - Alterations in personality  |
|   |   | - Applications  |
|   |   | **Lecture**  |
|   |   | **Discussion**  |
|   |   | **Demonstration**  |
|   |   | **Essay type**  |
|   |   | **Short answers**  |

| VI | 7 | Describe the psychology of people during the life cycle |
|   |   | **Developmental Psychology**  |
|   |   | - Psychology of people at different ages from infancy to old age  |
|   |   | - Psychology of vulnerable individuals: challenged, women, sick, etc.  |
|   |   | - Psychology of groups  |
|   |   | **Lecture**  |
|   |   | **Discussion**  |
|   |   | **Case discussion**  |
|   |   | **Essay type**  |
|   |   | **Short answers**  |

| VII | 8 | Describe the characteristics of mentally healthy person. |
|     |   | **Mental Hygiene And Mental Health**  |
|     |   | - Concepts of mental hygiene and mental health  |
|     |   | - Characteristics of mentally healthy persons  |
|     |   | - Warning signs of poor mental health  |
|     |   | - Promotive and preventive mental health strategies and services  |
|     |   | - Ego defense mechanisms and implications  |
|     |   | - Personal and social adjustments  |
|     |   | - Guidance and counseling  |
|     |   | - Role of nurse  |
|     |   | **Lecture**  |
|     |   | **Discussion**  |
|     |   | **Case discussion**  |
|     |   | **Role play**  |
|     |   | **Demonstration**  |
|     |   | **Essay type**  |
|     |   | **Short answers**  |

| VIII | 4 | Explain the psychological assessments and role of nurses |
|     |   | **Psychological Assessment & Tests**  |
|     |   | - Types, development  |
|     |   | - Characteristics, principles, uses, interpretations and role of nurse in psychological assessment  |
|     |   | **Lecture**  |
|     |   | **Discussion**  |
|     |   | **Demonstration**  |
|     |   | **Practice sessions**  |
|     |   | **Assessment of practice**  |

## Foundations of Nursing

**Placement:** First year  
**Time:** Theory – 265 hours  
Lab – 200 hours  
Clinical – 450 hours

**Course Description**  
This course is designed to help the students to develop an understanding of the nursing profession, philosophy, objectives, theories and application of nursing in various clinical settings. It is aimed at helping the students to acquire knowledge, understanding and skills in techniques of nursing and practice them in supervised clinical settings.

<table>
<thead>

<th>Unit</th>
<th>Time (Hrs)</th>
<th>Learning Objective</th>
<th>Content</th>
<th>Teaching Learning Activities</th>
<th>Assessment Methods</th>
</tr>
</thead>
</table>
| I    | 10         | Describe the concept of health, illness and health care agencies | **Health and Illness**  
*Health*  
- Definition, concept  
- Concept of health illness continuum  
- Factors influencing health  
*Illness*  
- Definition  
- Causes and risk factors for developing illness  
- Illness and illness behaviour  
- Impact of illness on patient and family  
**Health Care Services**  
- Health promotion and prevention, primary care, diagnosis, treatment, rehabilitation and continuing care  
- Health care teams  
- Types of health care agencies  
**Hospital**  
- Definition, types, organization and functions  
- Health promotion and levels of disease prevention  
- Primary health care & its delivery- role of nurse | - Lecture  
- Discussion  
- Visit to health care agencies | **Essay type**  
- Short answers  
- Objective type |
| II   | 10         | Explain concept and scope of nursing | **Nursing as a Profession**  
*Profession*  
- Definition and characteristics  
**Nursing**  
- Definition, concepts, philosophy, objectives | - Lecture  
- Discussion  
- Care discussion  
- Role plays | **Essay type**  
- Short answers  
- Objective type |
| III | 4 | Explain the admission and discharge procedure | [B.Sc Nursing Curriculum](#) |
| Describe values, code of ethics and professional conduct for nurses in India | |

**Concepts in Nursing**
- Core-care-cure concept, patient centered approach, comprehensive nursing, holistic approach
- Characteristics, nature and scope of nursing practice
- Functions of a nurse
- Qualities of a nurse
- Categories of nursing personnel
- Nursing as a profession
- History of nursing in India, trends in nursing

**Values**
- Definition, types and values in professional Nursing: caring and advocacy

**Ethics:**
- Definition and ethical principles
- Code of ethics and professional conduct for nurse
- Legal aspects in nursing

**Hospital Admission And Discharge**

**Admission to the Hospital**
- Unit and its preparation, admission bed
- Admission procedure
- Special considerations
- Medico–legal issues
- Roles and responsibilities of the nurse

**Discharge from the Hospital**
- Types: planned discharge, LAMA & abscond, referrals and transfers
- Discharge Planning
- Discharge procedure
- Special considerations
- Medico–legal issues
- Roles and responsibilities of the nurse
- Care of the unit after discharge

| Lecture | Discussion | Demonstration | Lab practice | Supervised clinical practice |
| Essay type | Short answers | Objective type | Assess skills with check list | Clinical practical examination |
| IV | 10 | Communicate effectively with patient, families and team members and maintain effective human relations projecting professional image | **Communication and Nurse Patient Relationship**  
**Communication:**  
- Levels, elements, types, modes, process, factors influencing communication  
- Methods of effective communication - attending skills  
- Rapport building skills  
- Empathy skills  
- Barriers to effective communication  
**Helping Relationships (NPR)**  
- Johari Window  
- Dimensions of helping relationships, phases of a helping relationship.  
- Communicating effectively with patient, families and team members and maintain effective human relations with special reference to communicating with vulnerable group (children, women, physically and mentally challenged and elderly)  
**Patient Teaching:**  
- Importance, purposes, process, role of nurse and integrating teaching in nursing process | o Lecture  
- Discussion  
- Role play and video film on the nurses interacting with the patient  
- Practice session on patient teaching  
- Supervised clinical practice | o Essay type  
- Short answers  
- Objective type |

| V | 10 | Explain the concept, uses, format and steps of nursing process | **The Nursing Process**  
**Critical Thinking And Nursing Judgment:**  
- Critical thinking, thinking and learning, competencies, attitudes for critical thinking, levels of critical thinking in nursing  
**Nursing process overview**  
- Definition, steps  
- Application in practice  
- Nursing process format  
- Assessment: collection of data, types, sources, methods, formulating nursing judgment, data interpretation | o Lecture  
- Discussion  
- Demonstration  
- Exercise  
- Supervised clinical practice | o Essay type  
- Short answers  
- Objective type |

### Documentation and Reporting

**Documentation**
- Purposes of recording and reporting
- Communication within the health care team,

**Records**
- Purpose
- Types of records: ward records, medical/nursing records
- Keeping forms, computerized documentation
- Guidelines for reporting: factual basis, accuracy, completeness, correctness,
- Organization, confidentiality
- Methods of recording

**Reporting** - Nurses report
- Change of shift reports, transfer reports, incident reports
- Minimizing legal liability through effective record keeping

| IX | 3 | Describe the types and care of machinery, equipment and linen | **Machinery, Equipment And Linen**  
- Types: disposable and reusable: linen, rubber goods, glassware, metal, plastic, furniture, machinery.  
- Introduction: Indent, maintenance, inventory. | ○ Lecture  
○ Discussion | ○ Essay type  
○ Short answers  
○ Objective type |
| X | 3 | Describe principles and techniques for infection control and biomedical waste management in supervised clinical settings | **Infection Control in Clinical Settings**  
**Infection Control:**  
- Nature of infection  
- Chain of infection,  
- Transmission,  
- Defenses against infection: natural and acquired  
- Hospital acquired infection (Nosocomial infection)  
**Concepts of Asepsis:**  
Medical and surgical asepsis  
**Isolation Precautions:**  
(Barrier nursing)  
- Hand washing: simple hand antisepsis and surgical antisepsis (scrub)  
- Isolation: source and protective  
- Personal protecting, equipment: types, uses and techniques of wearing and removing.  
- Decontamination of equipment and unit  
- Transportation of infected patients  
- Standard safety precautions  
- (Universal precautions)  
- Transmission based precautions | ○ Lecture  
○ Discussion  
○ Demonstration  
○ Practice session supervised clinical practice | ○ Essay type  
○ Short answers  
○ Objective type  
○ Assess  
○ Skills with check list  
○ Clinical practical examination |
Describe the basic, physiological and psychosocial needs of patient

Meeting Needs Of Patient

Basic Needs (Activities Of Daily Living)

i. Provide Safe And Clean Environment

- Physical environment: temperature, humidity, noise, ventilation, light, odor, pests control.
- Reduction of physical hazards: fire, accidents
- Safety devices: restraints, side rails, airways, trapeze, etc
- Role of nurse in providing safe and clean environment: patient environment, room equipment and linen, making patient beds
- Types of beds and bed making

i. Comfort

- Factors influencing comfort
- Comfort devices

ii. Hygiene

- Factors influencing hygienic practice
- Hygienic care of the skin: bath and pressure points, feet and nail, oral cavity, hair care, eyes, ears, and nose
  - Assessment, principles, types, equipment, procedure, special considerations.

| XI | 70 |

| | | | Essay type |
| | | | Short answers |
| | | | Objective type |
| Describe the principles and techniques for meeting basic physiological needs | **Physiological Needs**  
**i. Sleep and Rest**  
- Physiology of sleep  
- Factors affecting sleep  
- Promoting rest and sleep  
- Sleep disorders  
**ii. Nutrition**  
- Importance  
- Factors affecting nutritional needs  
- Assessment of nutritional needs: variables  
- Meeting nutritional needs: principles, equipment, procedure and special consideration  
  - Oral  
  - Enteral: Naso/orogastric  
  - Gastrostomy  
  - Parenteral  
- Treatment related to GIT system  
- Nasogastric suction.  
**iii. Urinary Elimination**  
- Review of physiology of urine elimination, composition and characteristics of urine, factors influencing urination  
- Alteration in urinary elimination  
- Retention of urine incontinence assessment and management  
- Types and collection of urine specimen  
- Observation, urine testing  
- Facilitating urine elimination, assessment, types, equipment, procedures and special considerations  
  - Providing urinal/bed pan  
  - Condom drainage  
  - Perineal care  
  - Catheterization  
  - Care of urinary drainage  
  - Bladder irrigation |
### iv. Bowel Elimination
- Review of physiology of bowel elimination
- Composition and characteristics of faeces
- Factors affecting bowel elimination
- Alteration in bowel elimination: constipation, diarrhoea, faecal impaction, nursing management.
- Types and collection of specimen of faeces, observation
- Facilitating bowel elimination
- Assessment
- Equipment, procedures and special considerations
  - Passing of flatus tube
  - Enemas
  - Suppository
  - Sitz bath
  - Bowel wash

### v. Mobility and Immobility
- Principles of body mechanics
- Maintenance of normal body alignment and mobility
- Hazards associated with immobility
- Alteration in body alignment and mobility
- Nursing interventions for impaired body alignment and mobility assessment, types, devices used, methods and special consideration, rehabilitation aspects
  - Range of motion exercises
  - Maintaining body
  - Alignment: positions
  - Moving
  - Lifting
  - Transferring
  - Walking
  - Restraints
<table>
<thead>
<tr>
<th>B.Sc Nursing Curriculum</th>
</tr>
</thead>
</table>

- Care of patients having alteration in mobility
- Assessment of patient having alteration in mobility
- Assessment of self care ability and special consideration

**vi. Oxygenation**
- Review of cardiovascular and respiratory physiology
- Factors affecting oxygenation
- Alterations in oxygenation
- Nursing interventions in oxygenation: assessment, types, equipment used, procedure and special consideration.
  - Maintenance of patent airway
  - Oxygen administration
  - Chest physiotherapy and postural drainage
  - Care of chest drainage
  - Pulse oximetry
  - CPR-Basic Life support

**vii. Fluid, Electrolyte, and Acid Base Balances**
- Review of physiological regulation of fluid electrolyte, and acid base balances
- Assessment, types, equipment procedure and special considerations
  - Measuring fluid intake and output.
  - Correcting fluid electrolyte imbalance, replacement of fluids: oral and parenteral, venipuncture
- Regulating IV Flow rates, changing IV solutions and tubing, changing IV dressing

**viii. Blood Transfusion**
- Indications
- Blood grouping and cross matching
| XII | 40 | Explain the principles, routes, effects of administration of medications |
| --- | --- | Administration of Medications |
| i. General Principles/considerations |
| o Purposes of medication |
| o Principles: Five (5) rights, special considerations, prescriptions, safety in administering medications and medication errors |
| o Drug forms |
| o Routes of administration storage and maintenance of drugs and nurses responsibility |
| o Broad classification of drugs |
| o Therapeutic effect, side effects, toxic effects, idiosyncratic reactions, allergic reactions, drug tolerance, drug interactions. |
| o Factors Influencing drug actions |
| o Systems of drug measurement: metric system, apothecary system, household measurements solutions |

| Psychosocial needs of patient |
| Perform nursing assessment, plan, implement and evaluate the care for meeting basic, physiological and psychosocial needs of patient |
| ix. Psychosocial Needs |
| o Concepts of cultural diversity, stress and adaptation, self-concept, sexuality, spiritual health, coping with loss, death and grieving |
| o Assessment of psychosocial needs |
| o Nursing intervention for psychosocial needs |
| ▪ Assist with coping and adaptation |
| ▪ Creating therapeutic environment |

|x. Recreational and Diversional Therapies |
| Calculate conversions of drugs and dosages within and between system of measurements |
| o Lecture |
| o Discussion |
| o Demonstration |
| o Practice session |
| o Supervised clinical practice |
| o Essay type |
| o Short answers |
| o Objective type |
| o Assess with check list and clinical practical examination |
Administer drugs by the following routes: oral, intradermal, subcutaneous, intramuscular, intravenous topical, inhalation

- Converting measurements units: conversion within one system, conversion between systems, dosage calculation,
- Terminologies and abbreviations used in prescriptions of medications

**ii. Oral Drugs Administration**
- Oral, sublingual and buccal: equipment, procedure

**iii. Parenteral**
- General principles: decontamination and disposal of syringes and needles
- Types of parenteral therapies
- Types of syringes, needles, canula, and infusion sets
- Protection from needle stick injuries: giving medications with a safety syringe.
- Routes of parenteral therapies
  - Intradermal: purpose, site, equipment, procedure, special considerations
  - Subcutaneous: purpose, site, equipment, procedure, special considerations
  - Intramuscular: purpose site, equipment, procedure, special considerations
  - Intravenous: purpose, site equipment procedure, special considerations.
  - Advanced techniques: epidural, intrathecal, intraosseous, intra peritoneal, intrapleural, intrarterial.
- Role of nurse

**iv. Topical Administration**
- Purpose, site, equipment, procedure, special consideration
- Application to skin
- Application to mucous membrane
| XIII | 5 | Explain the principles, classifications and therapeutic uses of heat and cold | **Therapeutic Uses Of Heat And Cold**  
- General principles, classification  
- Hot application: effect on the body  
- Classification: hot water bag, infrared therapy, fomentation, Sitz bath, hypo and hyperthermic measures.  
- Cold application: cold compress, ice cap, tepid sponge  
- Nurses’ responsibility in heat and cold applications. | ○ Lecture  
○ Discussion  
○ Demonstration  
○ Practice session  
○ Supervised clinical practice | ○ Essay type  
○ Short answers  
○ Objective type  
○ Assess with check list and clinical practical examination |
| XIV | 10 | Describe the pre and postoperative care of patients. Explain the process of wound healing. Explain the principles and techniques of wound care. | **Meeting needs of Perioperative Patients**  
- Definition and concept of perioperative nursing.  
- Preoperative phase: preparation of patient for surgery.  
- Intraoperative: operation theatre setup and environment, role of nurse  
- Postoperative phase: recovery unit, postoperative unit, postoperative care | ○ Lecture  
○ Discussion  
○ Demonstration  
○ Practice session  
○ Supervised clinical practice | ○ Essay type  
○ Short answers  
○ Objective type  
○ Assess with check list and clinical practical examination |
| XV | 5 | Explain the care of patients having alterations in body functioning | Meeting Special Needs Of The Patient
Care of Patients Having Alterations in:
- **Sensorium** (unconsciousness): assessment, management.
- **Functioning of sensory organs** (visual & hearing impairment): assessment of self-care ability, communication methods and special considerations.
- **Mobility** (physically challenged, cast): assessment of self-care ability, communication methods and special considerations.
- **Mental state** (mentally challenged): assessment of self-care ability, communication methods and special considerations.
- **Comfort** (pain): nature, types, factors influencing pain, coping, assessment, management. | Lecture
Discussion
Supervised clinical practice | Essay type
Short answers
Objective type |

| XVI | 5 | Explain the care of terminally ill patient | Care of terminally ill patient
- Concepts of loss, grieving process
- Signs of clinical death
- Care of dying patient: special consideration
- Advance directives: euthanasia, will, dying declaration, organ donation etc.
- Medico-legal issues
- Care of dead body
- Equipment, procedure and care of unit
- Autopsy
- Embalming | Lecture
Discussion
Demonstration
Case, discussion / role play
Practice session
Supervised clinical practice | Essay type
Short answers
Objective type |
| XVII | 5 | Explain concepts, models and theories. Introduce theories in Nursing |
| Professional Nursing Concepts And Practices |
| ○ Conceptual and theoretical models of nursing practice: |
| ○ Introduction to models: holistic, health belief, health promotion etc. |
| ○ Introduction to Theories in Nursing: Abdellah, Henderson’s, Orem’s, Neuman’s, Roger’s, Roy’s, and Maslow. |
| ○ Lecture |
| ○ Discussion |
| ○ Essay type |
| ○ Short answers |
| ○ Objective type |

| XVIII | 17 | Explain the principles of first aid. Demonstrate application of bandages |
| First Aid Nursing |
| ○ Definition, preparation of equipment, qualification of a first aider, application of bandages and slings. |
| ○ Shifting of patients with spine dislocation, padding and splinting fractured limbs. |
| ○ First aid measures and antidotes in poisoning |
| ○ Immediate care of patients with snakebite, rabid dog bite, burns, scalds, frost bite, sunstroke, first aid and nursing management in simple emergencies |
| ○ Common accidents, preventive measures emergency care of poisoning wounds: poisoning, foreign body in the eye, ear, nose & throat |
| ○ Cardiopulmonary resuscitation (CPR) |
| ○ Lecture |
| ○ Discussion |
| ○ Demonstration |
| ○ Short answers |
| ○ Multiple choice |
| ○ Objective type |

### Nursing Management Of Patient (Adults Including Elderly) With Blood And Cardio Vascular Problems

- **Review of anatomy and physiology of blood and cardio vascular system**
- **Nursing assessment: history and physical assessment**
- **Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management of**

#### Vascular system:
- Hypertension
- Hypotension
- Artherosclerosis
- Raynaud’s disease
- Aneurysm and peripheral vascular disorders

#### Heart
- Coronary artery disease
  - Ischemic heart disease
  - Coronary atherosclerosis
  - Angina pectoris
  - Myocardial infarction
▪ Valvular disorders of the heart
  ▪ Congenital and acquired
  ▪ Rheumatic heart diseases
▪ Endocarditis, pericarditis, myocarditis
▪ Cardio myopathies
▪ Cardiac dysrhythmias, heart block
▪ Congestive cardiac failure
  ▪ Cor-pulmonale, pulmonary edema, cardiogenic shock, cardiac tamponade
▪ Cardiac emergencies an arrest
▪ Cardio pulmonary resuscitation (CPR)
▪ Blood
  ▪ Anaemias
  ▪ Polycythemias
  ▪ Bleeding disorders, clotting factor defects and platelet defects
  ▪ Thalassemia
  ▪ Leukaemias
  ▪ Leukopenias and agranulocytosis
  ▪ Lymphomas
  ▪ Myelomas
▪ Special therapies
  ▪ Blood transfusion, safety checks, procedure and requirements, management of adverse transfusion reaction, records for blood transfusion
  ▪ Role of nurse in organ donation, retrieval and banking
| VI | 10 | Describe the etiology, pathophysiology, clinical manifestations, diagnostic measures and nursing management of patients (adults including elderly) with disorders of genitor-urinary system. | **Nursing Management Of Patient (Adults Including Elderly) With Genito-Urinary Problems**
- Review of anatomy and physiology of genito-urinary system
- Nursing assessment: history and physical assessment
- Etiology, pathophysiology clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management of:
  - Nephritis
  - Nephrotic syndrome
  - Nephrosis
  - Renal calculus
  - Tumors
  - Acute renal failure
  - Chronic renal failure
  - End stage renal disease
  - Dialysis, renal transplant
  - Congenital disorders, urinary infections
  - Benign prostate hypertrophy
  - Disorders of ureter, urinary bladder and urethra inflammation, infection, stricture, obstruction tumor, prostrate
- Special therapies, alternative therapies
- Nursing procedures
- Drugs used in treatment of genitor urinary disorders | **Lecture**

○ Objective type  
○ Assessment of skills with check list  
○ Assessment of patient management problem |
Describe the etiology, pathophysiology, clinical manifestations, diagnostic measures and nursing management of patients (adults including elderly) with disorders of skin.

Nursing Management Of Patient (Adult Including Elderly) With Disorders Of Integumentary System
- Review of anatomy and physiology of skin and its appendages
- Nursing assessment: history and physical assessment
- Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management of disorders of skin and its appendages.
- Lesions and abrasions
- Infection and infestations, dermatitis
- Dermatoses, infectious and non infectious “inflammatory dermatoses”
- Acne vulgaris
- Allergies and eczema
- Psoriasis
- Malignant melanoma
- Alopecia
- Special therapies, alternative therapies
- Nursing procedures
- Drugs used in treatment of disorders of integumentary system

- Lecture
- Discussion
- Explain using charts, graphs
- Models, films, slides
- Practice session
- Case discussion/seminar
- Health education

| patients (adults including elderly) with communicable disease | o Epidemiology, infectious process, clinical manifestations, diagnosis, treatment, prevention and dietetics, control and eradication of common communicable diseases:  
  - Tuberculosis  
  - Diarrhoeal diseases  
  - Hepatitis A-E  
  - Herpes  
  - Chickenpox  
  - Smallpox  
  - Typhoid  
  - Meningitis  
  - Gas gangrene  
  - Leprosy  
  - Dengue  
  - Plague  
  - Malaria  
  - Diphtheria  
  - Pertussis  
  - Poliomyelitis  
  - Measles  
  - Mumps  
  - Influenza  
  - Tetanus  
  - Yellow fever  
  - Filariasis  
  - HIV, AIDS  
  o Reproductive tract infections  
  o Special infection control measures notification, isolation, quarantine, immunization, infectious disease hospitals  
  o Special therapies, alternative therapies  
  o Nursing procedures  
  o Drugs used in treatment of communicable diseases | o Health education  
  o Supervised clinical practice  
  o Drug book/presentation | o Assessment of patient management problem |

| XIII 25 | Describe the organization and physical setup of operation theater and identify the various instruments and equipments used | **Peri-operative Nursing:**  
  o Organization and physical setup of the operation theater (OT):  
    - Classifications  
    - O.T. Design  
    - Staffing  
    - Members of the OT team | o Lecture  
  o Discussion  
  o Explain using charts, graphs  
  o Models, films, slides  
  o Practice session  
  o Case discussion/seminar | o Essay type  
  o Short answers  
  o Objective type  
  o Assessment of skills with check list |

| General medical ward (respiratory, GI, endocrine, renal hematology) | 6                   | Provide nursing care to adult patients with medical disorders               | Assessment of the Patient  
- Taking history  
  - Perform general and specific physical examination  
  - Identify alterations and deviations  
- Practice medical surgical asepsis: standard safety measures  
- Administer medications  
  - Oral, IV, IM subcutaneous  
  - IV therapy  
  - IV cannulation  
  - Maintenance and monitoring  
- Oxygen therapy by different methods  
- Nebulization  
- Chest physiotherapy  
- Nasogastric feeding  
- Assist in common diagnostic procedures  
- Perform/assist in therapeutic procedures  
- Blood and component therapy  
- Throat suctioning  
- Collect specimens for common investigations  
- Maintain elimination  
  - Catheterization  
  - Bowel wash  
  - Enema  
  - Urinary drainage  
- Maintain intake, output and documentation  
- Counsel and teach: related to specific disease conditions | Plan and give care to 3 - 4 assigned patients  
- Nursing care plan - 2  
- Nursing case study/presentation - 1  
- Drug presentation - 1  
- Maintain drug book  
- Maintain practical record book | Assess performance with rating scale  
- Assess each skill with checklist  
- Evaluation of case study/presentation  
- Completion of practical record |
| Counsell and educate patients and families |                     |                                                                            |                                                                        |                                                                            |                                                          |

| Placement | Second year | Time | 760 hours |
| General surgical ward (GI, urinary CVTS) | 6 | Provide pre and post operative nursing care to adult patients with surgical disorders. Counsel and educate patients and families. | **Assessment of the Patient**  
- Practice medical and surgical asepsis: standard safety measures  
- Preoperative preparation of patients  
- Post operative care: receiving patient, assessment, monitoring, care  
- Care of wounds and drainage  
- Suture removal  
- Ambulation and exercise  
- Nasogastric aspiration  
- Care of chest drainage  
- Ostomy care  
  - Gastrostomy  
  - Colostomy  
  - Enterostomy  
- Blood and component therapy  
- Practice universal precautions | Plan and give care to 3 - 4 assigned patients  
- Nursing care plan - 2  
- Nursing case study/ presentation - 1  
- Maintain drug book | Assess performance with rating scale  
- Assess each skill with checklist  
- Evaluation of case study/presentation  
- Completion of practical record |

| Cardiology ward | 2 | Provide nursing care to patients with cardiac disorders. Counsel and educate patients and families. | **Assessment of the Patient**  
- Physical examination of the CVS  
- Recording and interpreting ECG  
- Monitoring of patients  
- Preparation and assisting in non-invasive and invasive diagnostic procedures  
- Administer cardiac drugs  
- Cardio pulmonary resuscitation  
- Teach patients and families  
- Practice medical and surgical asepsis: standards safety measures | Plan and give care to 3 - 4 assigned patients  
- Nursing care plan - 2  
- Nursing case study/ presentation - 1  
- Maintain drug book | Assess performance with rating scale  
- Assess each skill with checklist  
- Evaluation of case study/presentation  
- Completion of practical record |
| Skin & communicable diseases ward | 1 | Identify skin problems  
Provide nursing care to patients with skin disorders & communicable diseases  
Counsel and educate patients and families | Assessment of the Patient With Skin Disorders  
- Assist in diagnostic and therapeutic procedures  
- Administer topical medication  
- Practice medical surgical asepsis: standard safety measures  
- Use of personal protective equipment (PPE)  
- Give medicated baths  
- Counseling HIV positive patients  
- Teach prevention of infectious diseases | Plan and give care to 2 - 3 assigned patients  
- Health talk/ counseling HIV positive patients and families – 1  
- Maintain drug book | Assess performance with rating scale  
Evaluation of case study/presentation/health talk  
Completion of activity record |
| Orthopedic ward | 2 | Provide nursing care to patients with musculo skeletal disorders  
Counsel and educate patients and families | Assessment of Orthopedic Patients  
- Assist in application of plaster cast and removal of cast  
- Apply skin traction: buck’s extension traction  
- Assist in application and removal of prosthesis  
- Physiotherapy: range of motion exercise (ROM), muscle strengthening exercises  
- Crutch maneuvering technique  
- Activities of daily living  
- Ambulation  
- Teach and counsel patients and families | Plan and give care to 2-3 assigned patients  
- Nursing care plan -1  
- Nursing care study/presentation-1  
- Maintain drug book | Assess performance with rating scale  
Evaluation of case study/presentation/health talk  
Completion of activity record |
| Operation theatre | 6 | Identify instruments used in common operations  
Participate in infection control practice in the | Scrubbing, gowning, gloving, identify instruments, suturing materials for common operations  
Disinfection, carbolization, fumigation  
Preparation of instruments sets for common operations | Assist as a circulatory nurse in:  
- Major cases – 10  
- Minor cases - 5  
- Assist as a scrub nurse in: | Assess performance with rating scale  
Completion of activity record |

| I    | 6          | Describe the pharmaco-dynamics, pharmacokinetics and the principles of administration of drugs. | Introduction to Pharmacology  
○ Definitions  
○ Sources  
○ Terminology used  
○ Types: classification  
○ Pharmaco-dynamics: actions, therapeutic managements, adverse effects, toxicity of drugs  
○ Pharmacokinetics: absorption, distribution, metabolism, interaction, excretion  
○ Review: routes and principles of administration of drugs  
○ Indian pharmacopoeia: legal issues  
○ Rational use of drugs  
○ Principles of therapeutics | ○ Lecture  
○ Discussion  
○ Drug study/presentation | ○ Short answers  
○ Objective type |
| II   | 8          | Explain chemotherapy of specific infections and infestations and nurses’ responsibilities | Chemotherapy  
○ Pharmacology of commonly used:  
  ▪ Penicillin  
  ▪ Cephalosporins  
  ▪ Aminoglycosides,  
  ▪ Macrolide & broad spectrum antibiotics,  
  ▪ Sulfonamides  
  ▪ Quinolones  
  ▪ Antiamoebic  
  ▪ Antimalarial  
  ▪ Anthelminthics  
  ▪ Antiscabies agents  
  ▪ Antiviral & antifungal agents  
  ▪ Anti tubercular agents  
  ▪ Antileprosy agents  
  ▪ Anticancer agents | ○ Lecture  
○ Discussion  
○ Drug study/presentation | ○ Short answers  
○ Objective type |

▪ Antiasthmatics | ○ Lecture  
○ Discussion  
○ Drug study/presentation |
|      |   |                                                        | ○ Short answers  
○ Objective type |
| B.Sc Nursing Curriculum |

| VI | 3 | Describe drugs used on urinary systems and nurses’ responsibilities | Drugs used on Urinary System  
- Pharmacology of commonly used:  
  - Diuretics and antidiuretics  
  - Urinary antiseptics  
  - Cholinergic and anticholinergic  
  - Acidifiers and alkalinizers  
- Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse. | Lecture  
- Discussion  
- Drug study/presentation | Short answers  
Objective type |

| VII | 5 | Describe drugs used in de-addiction, emergency, deficiency of vitamins & minerals, poisoning, for immunization and immunosuppression and nurses’ responsibilities | Miscellaneous  
- Drugs used in de-addiction  
- Drugs used in CPR and emergency  
- Vitamins and minerals  
- Immunosuppressants  
- Antidotes  
- Antivenom  
- Vaccines and sera | Lecture  
- Discussion  
- Drug study/presentation | Short answers  
Objective type |
| VIII 3 | Describe drugs used on skin and mucous membrane and nurses’ responsibilities | **Drugs used on skin and mucous membranes**  
- Topical applications for skin, eye, ear, nose and buccal cavity, Antipruritics  
- Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse | ○ Lecture  
○ Discussion  
○ Drug study/presentation | ○ Short answers  
○ Objective type |
| IX 8 | Describe drugs used on nervous systems and nurses’ responsibilities | **Drugs acting on nervous system**  
- Basic & applied pharmacology of commonly used:  
  - Analgesics and anesthetics  
  - Analgesics: Non-steroidal anti inflammatory (NSAID) drugs  
  - Antipyretics  
  - Hypnotics & sedatives: opioids, non-opioids, tranquilizers, general & local anesthetics  
  - Gases: oxygen, nitrous oxide, carbon-dioxide  
  - Cholinergic and anti-cholinergics: Muscle relaxants, major tranquilizers, antipsychotics, antidepressants, anticonvulsants, adrenergics, noradrenergics, mood stabilizers, acetyl choline, stimulants  
- Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse. | ○ Lecture  
○ Discussion  
○ Drug study/presentation | ○ Short answers  
○ Objective type |
| B.Sc Nursing Curriculum |

### Describe drugs used on cardiovascular systems and nurses’ responsibilities

| Lecture |
| Discussion |
| Drug study/presentation |

### Cardiovascular drugs
- Hematinics
- Cardiotonics
- Anti-anginals
- Anti-hypertensives & vasodilators
- Anti-arrythmics
- Plasma expanders
- Coagulants & anticoagulants
- Antiplatelets & thrombolytics
- Hypolipidemics
  - Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse

### Drugs Used For Hormonal Disorders And Supplementation, Contraception And Medical Termination Of Pregnancy
- Insulins & oral hypoglycemics
- Thyroid supplements & suppressants
- Steroids & anabolics
- Uterine stimulants & relaxants
- Oral contraceptives
- Other estrogen-progestrone preparations
- Corticotrophine & gonadotropines
- Adrenaline
- Prostaglandins
- Calcitonins
- Calcium salts
- Calcium
- regulators
  - Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse
| B.Sc Nursing Curriculum |

| XII | 4 | Demonstrate awareness of the common drugs used in alternative system of medicine |
| Introduction to drugs used in alternative systems of medicine |
| o Ayurveda, Homeopathy, Unani, and Siddha |
| o Lecture |
| o Discussion |
| o Observational visits |
| o Short answers |
| o Objective type |

| I    | 6          | Define the common terms used in pathology  
Appreciate the deviations from normal to abnormal structure and functions of the body system | **Introduction**  
- Importance of study of pathology  
- Definition of terms  
- Methods and techniques  
- Cellular and tissue changes  
- Infiltration and regeneration  
- Inflammation and infections  
- Wound healing  
- Vascular changes  
- Cellular growth, neoplasm  
- Benign and malignant growths  
- In situ carcinoma  
- Disturbances of fluid and electrolyte balance | - Lecture  
- Discussion  
- Explain using charts | - Short answers  
- Objective type |
| II   | 15 4       | Explain pathological changes in disease conditions of various systems | **Special Pathology**  
- Pathologic changes in disease conditions of various system  
  - Respiratory tract  
    - Tuberculosis, bronchitis, pleural effusion and pneumonia  
    - Lung abscess, emphysema, bronchiectasis, bronchial asthma, chronic obstructive pulmonary disease and tumors | - Lecture  
- Discussion  
- Explain using charts, slides, specimen, X-rays and scans  
- Visit to pathology lab, endoscopy unit and OT | - Short answers  
- Objective type |

| I    | 2          | Describe concept and dimensions of health | **Introduction**  
- Community health nursing  
- Definition, concept and dimensions of health  
- Promotion of health  
- Maintenance of health  
- Difference between hospital nursing and community health nursing | ○ Lecture  
○ Discussion | ○ Short answers |
| II   | 20         | Describes determinants of health | **Determinants of health**  
- Eugenics  
- Environment:  
  - Physical: air, housing, sanitation, disposal of waste, disposal of dead bodies, forestation, noise, climate, communication: infrastructure facilities and linkages  
  - Acts regulating the environment: national pollution control board  
  - Bacterial and viral: agents, host, carriers and immunity  
- Food hygiene: production, preservation, purchase, preparation, consumption, sanitation of eating places and restaurants  
- Acts regulating food hygiene: prevention of food adulteration acts act  
- Socio-cultural  
  - Customs, taboos  
  - Marriage system  
  - Family structure  
  - Status of special groups: females, children, | ○ Lecture  
○ Discussion  
○ Explain using charts, graphs, models, films, slides  
○ Visits to water supply, sewage disposal, milk plants, slaughter houses etc. | ○ Essay type,  
○ Short answers  
○ Objective type |

## COMMUNICATION & EDUCATIONAL TECHNOLOGY

### Placement: Second year

### Time: 90 Hours
- Theory: 60 Hours
- Practical: 30 Hours

### Course Description:
This course is designed to help the students acquire an understanding of the principles and methods of communication and teaching. It helps to develop skill in communicating effectively, maintaining effective interpersonal relations, teaching individuals and groups in clinical, community health and educational settings.

- External ear: deformities, otalgia, foreign bodies and tumors.
- Middle ear: impacted wax, tympanic membrane perforation, otitis media, otosclerosis, mastoiditis, tumors.
- Inner ear: meniere’s disease, labyrinthitis, ototoxicity, tumors.
- Upper airway infections: common cold, sinusitis, rhinitis, pharyngitis, tonsillitis and adenoiditis, peritonsilar abscess, laryngitis.
- Upper respiratory airway: epistaxis
- Nasal obstruction, laryngeal obstruction, cancer of the larynx
- Cancer of the oral cavity
| II | 15 | Describe the etiology, pathophysiology, clinical manifestations, diagnostic measures and management of patients with disorders of eye. |
| Nursing Management Of Patient With Disorders Of Eye |
| ○ Review of anatomy and physiology of the eye. |
| ○ Nursing assessment: history and physical assessment |
| ▪ Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical & surgical nursing management of eye disorders: |
| ▪ Refractive errors |
| ▪ Eyelids: infection, tumors and deformities |
| ▪ Conjunctiva: inflammation and infection, bleeding |
| ▪ Cornea: inflammation and infection |
| ▪ Corneal transplantation |
| ○ Lecture |
| ○ Discussion |
| ○ Explain using charts, graphs |
| ○ Models, films, slides |

| ○ Assessment of patient management problem |
### Nursing Management Of Patient With Neurological Disorders

- Review of anatomy and physiology of the neurological system
- Nursing assessment: history and physical and neurological assessment and Glasgow coma scale
- Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical & surgical nursing management of neurological disorders:
  - Congenital malformations
  - Headache
  - Head injuries

### Describe the etiology, pathophysiology, clinical manifestations, diagnostic measures and nursing management of patients with neurological disorders

- Lens: cataracts
- Glaucoma
- Disorder of the uveal tract
- Ocular tumors
- Disorder of posterior chamber and retina: retinal and vitreous problems
- Retinal detachment
- Ocular emergencies and their prevention
  - Blindness
  - National blindness control program
    - Eye banking
    - Eye prostheses and rehabilitation
    - Role of a nurse: communication with visually impaired patient, eye camps
  - Special therapies
  - Nursing procedures: eye care, irrigation, instillation, dressing
  - Drugs used in treatment of disorders of eye.

### III 17

- Lecture
- Discussion
- Explain using charts, graphs
- Models, films slides
- Demonstration
- Practice session
- Case discussion/seminar
- Health education
- Supervised clinical practice
- Drug book/presentation
- Visit to rehabilitation centre

- Essay type
- Short answers
- Objective type
- Assessment of skills with check list
- Assessment of patient management problem
- Spinal injuries
  - Paraplegia
  - Hemiplegia
  - Quadriplegia
- Spinal cord compression: herniation of intervertebral disc
- Tumors of the brain & spinal cord
- Intra cranial and cerebral aneurysms
- Infections:
  - Meningitis
  - Encephalitis
  - Brain abscess
  - Neurocysticercosis
- Movement disorders
  - Chorea
  - Seizures
  - Epilepsies
- Cerebro Vascular Accidents (CVA)
- Cranial, spinal neuropathies
  - Bell’s palsy
  - Trigeminal neuralgia
- Peripheral Neuropathies: Guillain Barré syndrome
- Myasthenia gravis
- Multiple sclerosis
- Degenerative diseases
  - Delirium
  - Dementia
  - Alzheimer’s disease
  - Parkinson’s disease
- Management of unconscious patients and patients with stroke
  - Role of the nurse in communicating with patient having neurological deficit
  - Rehabilitation of patients with neurological deficit
  - Role of nurse in long stay facility (institutions) and at home
  - Special therapies
  - Nursing procedures
  - Drugs used in the treatment of neurological disorders
| IV | 10 | Describe the etiology, pathophysiology, clinical manifestations, diagnostic measures and nursing management of patients with burns, reconstructive and cosmetic surgery | **Nursing Management Of Patients With Burns, Reconstructive And Cosmetic Surgery**  
- Review of anatomy and physiology of the skin and connective tissues and various deformities  
- Nursing assessment: history and physical assessment and assessment of burns and fluid and electrolyte loss  
- Etiology, classification pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical & surgical nursing management of burns and re-constructive and cosmetic surgery  
- Types of re-constructive and cosmetic surgery for burns, congenital deformities, injuries and cosmetic purpose  
- Role of nurse  
- Legal aspects  
- Rehabilitation  
- Special therapies  
  - Psycho social aspects  
- Nursing procedures  
- Drugs used in treatment of burns reconstructive and cosmetic surgery | **Lecture**  
**Discussion**  
**Explain using charts, graphs**  
**Models, films, slides**  
**Demonstration**  
**Practice session**  
**Case discussion/ seminar**  
**Health education**  
**Supervised clinical practice**  
**Drug book/presentation** | **Essay type**  
**Short answers**  
**Objective type**  
**Assessment of skills with check list**  
**Assessment of patient management problem** |
| V | 10 | Describe the etiology, pathophysiology, clinical manifestations, diagnostic measures and nursing management of patients with oncological conditions. | **Nursing Management Of Patients With Oncological Conditions**  
- Structure & characteristics of normal & cancer cells  
- Cancer incidence and trends  
- Nursing assessment: history and physical assessment  
- Prevention, screening, early detection, warning signs of cancer | **Lecture**  
**Discussion**  
**Explain using charts, graphs**  
**Models, films, slides**  
**Demonstration**  
**Practice session**  
**Case discussion/ seminar**  
**Health education**  
**Supervised clinical practice** | **Essay type**  
**Short answers**  
**Objective type**  
**Assessment of skills with check list**  
**Assessment of patient management problem** |
| VI  | 10  | Describe organization of emergency and disaster care services | **Nursing Management Of Patient In Emergency & Disaster Situations Disaster nursing:**  
- Concepts and principles of disaster nursing  
- Causes and types of disaster: natural and man-made  
  - Earthquakes, floods, epidemics cyclones | **Drug book/presentation**  
- Lecture  
- Discussion  
- Explain using charts, graphs  
- Models, films slides  
- Demonstration  
- Practice session  
- Case discussion/seminar | **Essay type**  
- Short answers  
- Objective type  
- Assessment of skills with check list |
Describe the role of nurse in disaster management

- Fire, explosion, accidents
- Violence, terrorism, biochemical, war
- Policies related to emergency/disaster management: international, national, state, institutional
- Disaster preparedness
- Team, guidelines, protocols, equipment, resources
- Coordination and involvement of community, various Govt. departments, non-Govt. organizations and international agencies
- Role of nurse: working
- Legal aspects of disaster nursing
- Impact on health and after effects: Post Traumatic Stress Disorder
- Rehabilitation: physical, psychosocial, financial, relocation

**Emergency nursing**
- Concept, priorities, principles and scope of emergency nursing
- Organization of emergency services, physical setup, staffing, equipment and supplies, protocols, concepts of triage and role of triage nurse
- Coordination and involvement of different departments and facilities
- Nursing assessment: history and physical assessment
- Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical & surgical nursing management of patient with medical and surgical emergency

- Health education
- Supervised clinical practice
- Disaster management drills
- Drug book/presentation

- Assessment of patient management problem

Council and educate patient and families | ○ Perform neurological examination  
○ Use Glasgow coma scale  
○ Assist with diagnostic procedures  
○ Assist with therapeutic procedures  
○ Teach patients and families  
○ Participate in rehabilitation programme | ○ Provide care to assigned patients with neurological disorders  
○ Case study/case presentation-1  
○ Maintains drug book  
○ Health teaching-1 | ○ Assess each skill with check list  
○ Assess performance with rating scale  
○ Evaluation of case study and health teaching  
○ Completion of activity record |
| Burns unit & plastic and reconstructive surgery unit | 1 | Provide care to patients with burns | - Assessment of the burns patient  
  ▪ Percentage of burns  
  ▪ Degree of burns  
  ▪ Fluid and electrolyte replacement therapy  
  ▪ Assess  
  ▪ Calculate  
  ▪ Replace  
  ▪ Record intake and output  
  ▪ Care of burn wounds  
  ▪ Assessment of flaps and grafts  
  ▪ Assist with diagnostic procedures  
  ▪ Assist with therapeutic procedures  
  ▪ Teach patients and families  
  ▪ Participate in rehabilitation programme | - Provide care to assigned patients  
  - Nursing care plans  
  - Case study/case presentation-1  
  - Observation report on burns | - Assess each skill with check list  
  - Assess performance with rating scale  
  - Evaluation of case study and health teaching  
  - Completion of activity record |

| Oncology Unit | 1 | Provide care to patients with cancer | - Screen for common cancers: TNM classification  
  - Assist with diagnostic procedures  
  ▪ Biopsies  
  ▪ Pap smear  
  ▪ Bone marrow aspiration  
  - Breast examination  
  - Assist with therapeutic procedures  
  - Participates in various modalities of treatment  
  ▪ Chemotherapy  
  ▪ Radiotherapy  
  ▪ Pain management  
  ▪ Stomal therapy  
  ▪ Hormonal therapy  
  ▪ Immunotherapy  
  ▪ Gene therapy  
  ▪ Alternative therapy  
  - Participate in palliative care  
  - Counsel and teach patents & families  
  ▪ Self breast examination  
  ▪ Warning signs  
  - Participate in rehabilitation programme | - Provide care to assigned patients  
  - Nursing care plans  
  - Case study/case presentation-1  
  - Observation report on cancer unit | - Assess each skill with check list  
  - Assess performance with rating scale  
  - Evaluation of case study and health teaching  
  - Completion of activity record |

| I    | 15         | Explain the modern concept of child care & principles of child health nursing  
Describe national policy programs and legislation in relation to child health and welfare  
List major causes of death during infancy, early & late childhood  
Describe the major functions and role of the paediatric nurse in caring for a hospitalized child | **Introduction Modern Concepts Of Child Care**  
- Principles of child health nursing  
- Internationally accepted rights of the child  
- National policy and legislations in relation to child health and welfare  
- National programs related to child health and welfare  
- Agencies related to welfare services to the children  
- Changing trends in hospital care, preventive, promotive and curative aspects of child health  
- Child morbidity and mortality rates  
- Differences between an adult and child  
- Impact of hospitalization on the child family  
- Grief and bereavement  
- The role of child health nurse in caring for a hospitalized child  
- Principles of pre and post operative care of infants and children  
- Child health nursing procedures |  
- Lecture  
- Discussion  
- Demonstration of common paediatric procedures |  
- Short answers  
- Objective type  
- Assessment of skills with check list |
| II   | 20         | Describe the normal growth & development of children at different ages  
Identify the | **The Healthy Child**  
- Principles of growth and development  
- Factors affecting growth & development |  
- Lecture  
- Discussion  
- Developmental study of infant and children |  
- Short answers  
- Objective type |
| II | 20 | needs of children at different ages & provide parental guidance | o Growth and development from birth to adolescence  
| | | | o The needs of normal children through the stages of developmental and parental guidance  
| | | | o Nutritional needs of children & infants: breast feeding, exclusive breast feeding supplementary/artificial feeding and weaning.  
| | | | o Baby friendly hospital concept  
| | | | o Accidents: causes and prevention  
| | | | o Value of play and selection of play material  
| | | | o Preventive immunization, immunization programme and cold chain  
| | | | o Preventive paediatrics  
| | | | o Care of under five & under five clinics/well baby clinics  
| | | | o Observation study of normal and sick child  
| | | | o Field visit to Anganwadi, child guidance clinic  
| | | | o Film show on breast feeding  
| | | | o Clinical practice/field  
| | | | o Assessment of field visits and developmental study reports  
| III | 10 | Provide care to normal & high risk neonates  
Perform neonatal resuscitation  
Recognize and manage common neonatal problems | Nursing Care Of Neonate  
o Nursing care of a normal newborn/essential newborn care  
o Neonatal resuscitation  
o Nursing management of a low birth weight baby  
o Kangaroo mother care  
o Nursing management of common neonatal disorders  
o Organization of neonatal unit  
o Identification & nursing management of common congenital malformations  
| IV | 10 | Integrated Management Of Neonatal And Childhood Illnesses (IMNCI)  
| V | 25 | Provide nursing care in common childhood diseases | Nursing Management In Common Childhood Diseases  
o Nutritional deficiency disorders  
| | | | o Lecture  
| | | | o Discussion  
| | | | o Workshop on neonatal resuscitation  
| | | | o Demonstration  
| | | | o Practice session  
| | | | o Clinical practice  
| | | | o Short answers  
| | | | o Objective type  
| | | | o Assessment of skills with check list  
| | | | o Short answers  
| | | | o Objective type  

Identify measures to prevent common childhood diseases including immunization

- Respiratory disorders and infections
- Gastrointestinal infections, infestations and congenital disorders
- Cardio vascular problem: congenital defects and rheumatic fever, rheumatic heart disease
- Genito-urinary disorders: acute glomerulo nephritis, nephrotic syndrome, Wilm’s tumor, infection and congenital disorders.
- Neurological infections and disorders: convulsions, epilepsy, meningitis, hydrocephalus, spina-bifida
- Hematological disorders: anemias, thalassemia, ITP, leukemia, hemophilia
- Endocrine disorders: juvenile diabetes mellitus
- Orthopedic disorders: club feet, hip dislocation and fracture
- Disorders of skin, eye, and ears
- Common communicable diseases in children, their identification, nursing management in hospital and home and prevention.
- Child health emergencies: poisoning, foreign bodies, hemorrhage, burns and drowning
- Nursing care of infant and children with HIV/AIDS
- Assessment of skills with checklist

| **Paediatric medicine ward** | 3                   | Provide nursing care to children with various medical disorders           | o Taking paediatric history  
o Physical examination and assessment of children  
o Administer oral, I/M & IV medicine/Fluids  
o Calculation of fluid requirements  
o Prepare different strengths of I.V. fluids  
o Apply restraints  
o Administer O₂ inhalation by different methods  
o Give baby bath  
o Feed children by Katori spoon, etc  
o Collect specimens for common investigations  
Assist with common diagnostic procedures  
Teach mothers/parents about  
   ▪ Malnutrition  
   ▪ Oral rehydration therapy  
   ▪ Feeding & weaning  
   ▪ Immunization schedule  
   ▪ Play therapy  
   ▪ Specific disease conditions | o Give care to three assigned paediatric patients  
Nursing care plan – 1  
Case study/presentation – 1  
Health talk - 1 | o Short answers  
Objective type  
Assessment of skills with check list OSCE/OSPE  
Evaluation of care study presentation and health education session  
Completion of activity record |
| **Paediatric surgery ward** | 3                   | Recognize different pediatric surgical conditions/malformations          | o Calculate, prepare and administer I/V fluids  
Do bowel wash  
Care for ostomies:  
   ▪ Colostomy irrigation  
   ▪ Ureterostomy  
   ▪ Gastrostomy  
   ▪ Enterostomy  
Urinary catheterization and drainage | o Give care to three assigned paediatric patients  
Nursing care plan–1  
Case study/presentation– 1 | o Short answers  
Objective type  
Assessment of skills with check list OSCE/OSPE  
Evaluation of care study presentation |
| **Paediatric OPD/ Immunization room** | 1 | Perform assessment of children: health, developmental and anthropometric. Perform immunization. Give health education/nutritional education | ○ Assessment of children:  
- Health assessment  
- Developmental assessment  
- Anthropometric assessment  
- Immunization  
- Health/nutritional education | ○ Developmental study - 1 | ○ Assess clinical performance with rating scale  
○ Completion of activity record |
| **Paediatric medicine and surgery ICU** | 1 each | Provide nursing care to critically ill children | ○ Care of a baby in incubator/warmer  
○ Care of a child on ventilator  
○ Endotracheal suction  
○ Chest physiotherapy  
○ Administer fluids with infusion pump  
○ Total parenteral nutrition  
○ Phototherapy  
○ Monitoring of babies  
○ Cardio pulmonary resuscitation | ○ Nursing care plan- 1  
○ Observation report - 1 | ○ Assess clinical performance with rating scale  
○ Completion of activity record  
○ Evaluation of observation report |
# MENTAL HEALTH NURSING

**Placement:** Third year

**Course Description:** This course is designed for developing an understanding of the modern approach to mental health, identification, prevention and nursing management of common mental health problems with special emphasis on therapeutic interventions for individuals, family and community.

## Course Outline

<table>

| I    | 5          | Describe the historical development & current trends in mental health nursing. Describe the epidemiology of mental health problems. Describe the national mental health act, programmes and mental health policy. Discuss the scope of mental health nursing. Describe the concept of normal & abnormal behavior. | **Introduction**  
- Perspective of mental health and mental health nursing: evolution of mental health services, treatments and nursing practices.  
- Prevalence and incidence of mental health problems and disorders.  
- Mental Health Act  
- National mental health policy vis-a-vis National health policy.  
- National mental health programme  
- Mental health team  
- Nature and scope of mental health nursing  
- Role and functions of mental health nurse in various settings and factors affecting the level of nursing practice  
- Concepts of normal and abnormal behavior | **Lecture**  
**Discussion** | **Short answers**  
**Objective type**  
**Assessment of the field visit reports** |
| II   | 5          | Define various terms used in mental health nursing. Explains the classification of mental disorders. Explain psychodynamics of maladaptive behavior. | **Principles And Concepts Of Mental Health Nursing**  
- Definition: mental health nursing and terminology used  
- Classification of mental disorders: ICD  
- Review of personality development, defense mechanisms  
- Maladaptive behavior of individuals and groups: | **Lecture**  
**Discussion**  
**Explain using charts**  
**Review of personality development** | **Short answers**  
**Objective type**  
**Essay type** |

**Time:** Theory – 90 hours  
Practical – 365 hours
| III | 8 | Discuss the etiological factors, psychopathology of mental disorders  
Explain the principles and standards of nursing  
Describe the conceptual models of mental health nursing | stress, crisis and disaster  
○ Etiology: bio-psycho-social factors  
○ Psychopathology of mental disorders: review of structure and functions of brain, limbic system and abnormal neurotransmission  
○ Principles of mental health nursing  
○ Standards of mental health nursing practice  
○ Conceptual models and the role of nurse:  
  ▪ Existential  
  ▪ Psycho-analytical  
  ▪ Behavioral  
  ▪ Interpersonal | Lecture  
○ Discussion  
○ Demonstration  
○ Practice session  
○ Clinical practice | ○ Lecture  
○ Discussion  
○ Demonstration  
○ Practice session  
○ Clinical practice | ○ Short answers  
○ Objective type  
○ Assessment of skills with check list |
| IV | 6 | Describe nature, purpose and process of assessment of mental health status | Assessment of Mental Health status  
○ History taking  
○ Mental status examination  
○ Mini mental status examination  
○ Neurological examination review  
○ Investigations: related blood chemistry, EEG, CT & MRI  
○ Psychological tests  
○ Role and responsibilities of nurse | Lecture  
○ Discussion  
○ Demonstration  
○ Practice session  
○ Clinical practice | ○ Lecture  
○ Discussion  
○ Demonstration  
○ Practice session  
○ Clinical practice | ○ Short answers  
○ Objective type  
○ Assessment of skills with check list |
| V | 14 | Explain treatment modalities and therapies used in mental disorders and role of the nurse | **Treatment Modalities And Therapies Used In Mental Disorders**  
- Psycho pharmacology  
- Psychological therapies: therapeutic community, psycho therapy- individual: psycho-analytical, cognitive and supportive, family, group: behavioral, play, psycho-drama, music, dance, recreational and light therapy; relaxation therapies: yoga, meditation, biofeedback  
- Alternative systems of medicine  
- Occupational therapy  
- Physical therapy: electroconvulsive therapy  
- Geriatric considerations  
- Role of nurse in above therapies | Lecture  
- Discussion  
- Demonstration  
- Practice session  
- Clinical practice | Short answers  
- Objective type  
- Essay type |
| VI | 5 | Describe the etiology, psychopathology clinical manifestations, diagnostic criteria and management of patients with schizophrenia, and other psychotic disorders | **Nursing Management Of Patient With Schizophrenia, And Other Psychotic Disorder**  
- Classification: ICD  
- Etiology, psychopathology, types, clinical manifestations, diagnoses  
- Nursing assessment: history, physical and mental assessment  
- Treatment modalities and nursing management of patients with schizophrenia and other psychotic disorders  
- Geriatric considerations  
- Follow up and home care and rehabilitation | Lecture  
- Discussion  
- Demonstration  
- Practice session  
- Clinical practice | Short answers  
- Objective type  
- Assessment of patients management problems |
| VII | 5 | Describe the etiology, psychopathology clinical manifestations, diagnostic criteria and management of patients with mood disorders | **Nursing Management Of Patient With Mood Disorders**  
- Mood disorders: bipolar affective disorder, mania, depression, and dysthymia etc | Lecture  
- Discussion  
- Demonstration  
- Practice session  
- Clinical practice | Short answers  
- Objective type  
- Assessment of patients management problems |
| VIII 8 | Describe the etiology, psychopathology, clinical manifestations, diagnostic criteria and management of patients with neurotic, stress related and somatization disorders | **Nursing Management Of Patient With Neurotic, Stress Related And Somatization Disorders**
- Anxiety disorder, phobias, dissociation and conversion disorder, obsessive compulsive disorder somatoform disorders, post traumatic stress disorder, adjustment disorders
- Etiology, psychopathology, clinical manifestations, diagnoses.
- Nursing assessment: history, physical and mental assessment
- Behavioral techniques used in the treatment of neurotic disorders
- Treatment modalities and nursing management of patients with neurotic stress related and somatization disorders
- Geriatric considerations
- Follow up and home care and rehabilitation | ○ Lecture
○ Discussion
○ Case presentation
○ Case discussion
○ Clinical practice | ○ Short answers
○ Objective type
○ Assessment of patients management problems
○ Essay type |

| IX 5 | Describe the etiology, psychopathology, clinical manifestations, diagnostic criteria and management of patients with substance use disorders | **Nursing Management Of Patient With Substance Abuse Disorders**
- Commonly used psychotropic substance: classification, forms, routes, action, intoxication and withdrawal | ○ Lecture
○ Discussion
○ Case presentation
○ Case discussion
○ Clinical practice | ○ Short answers
○ Objective type
○ Assessment of patients management problems |

| Psychiatric OPD   | 1                  | Assess patients with mental health problems  
Observe and assist in therapies  
Counsel and educate patient and families | ○ History taking  
○ Perform mental status examination (MSE)  
○ Assist in psychometric assessment  
○ Perform neurological examination  
○ Observe and assist in therapies  
○ Teach patient and family members | ○ History taking and mental status examination-2  
○ Health education 1  
○ Observation report of OPD | ○ Assess performance with rating scale  
○ Assess each skill with checklist  
○ Evaluation of health education  
○ Assessment of observation report  
○ Completion of activity record |
| Child guidance clinic | 1              | Assessment of children with various mental health problems  
Counsel and educate children, families and significant others | ○ History taking  
○ Assist in psychometric assessment  
○ Observe and assist in various therapies  
○ Teach family and significant others | ○ Case work -1  
○ Observation report of different therapies -1 | ○ Assess performance with rating scale  
○ Assess each skill with checklist  
○ Evaluation of the observation report |
| Inpatient ward    | 6                  | Assess patients with mental health problems  
To provide nursing care for patients with various mental health problems  
Assist in various therapies | ○ History taking  
○ Perform mental status examination (MSE)  
○ Perform Neurological examination  
○ Assist in psychometric assessment  
○ Record therapeutic communication  
○ Administer medications  
○ Assist in Electro Convulsive Therapy (ECT) | ○ Give care to 2-3 patients with various mental disorders  
○ Case study -1  
○ Care plan -2  
○ Clinical presentation -1  
○ Process recording 2  
○ Maintain drug book | ○ Assess performance with rating scale  
○ Assess each skill with checklist  
○ Evaluation of the case study  
○ Care plan, clinical presentation, process recording |
| Community psychiatry | 1 | To identify patients with various mental disorders To motivate patients for early treatment and follow up To assist in follow up clinic Counsel and educate patient, family and community | ○ Conduct case work ○ Identify individuals with mental health problems ○ Assist in mental health camps and clinics ○ Counsel and teach family members, patients and community | ○ Case work-1 ○ Observation report on field visit ○ Assess performance with rating scale ○ Evaluation of case work and observation report ○ Completion of activity record |

Counsel and educate patients, families and significant others

○ Participate in all therapies
○ Prepare patients for Activities of Daily Living (ADL)
○ Conduct admission and discharge counseling
○ Counsel and teach patients and families

○ Completion of activity record
# Maternity Nursing Including Gynecological Nursing-I

**Placement:** Third year  
**Time:** Theory: 90 hrs  
**Practical:** 180 hrs

**Course Description:** This course is designed for students to appreciate the concepts and principles of obstetrical nursing. It helps them to acquire knowledge and develop beginning skills in rendering nursing care to normal and high-risk mothers during antenatal, natal and postnatal periods in the hospital and community settings. It also helps to develop skill in managing normal and high-risk neonates and participate in family welfare programmes.

### Explain the components of health services
- Hospitals
- District
- State
- Centre
  - **Urban**: organization, staffing and functions of urban health services provided by government at:
    - Slums
    - Dispensaries
    - Maternal and child health centers
    - Special clinics
    - Hospitals
    - Corporation/municipality/board
  - **Components of health services**
    - Environmental sanitation
    - Health education
    - Vital statistics
    - MCH: antenatal, natal, post natal, MTP act, female feticide act, child adoption act
    - Family welfare
    - National health programmes
    - School health services
    - Occupational health
    - Defense services
    - Institutional services

### Describe alternative systems of health promotion and health maintenance
Describe the chain of referral system
  - Referral system
  - Public health legislation

### IV 25
**Community Health Nursing Approaches, Concepts And Roles And Responsibilities Of Nursing Personnel**
  - **Approaches**
    - Lecture
    - Discussion
    - Demonstration
    - Practice session
  - **Essay type
  - Short answers**

**IV**
Describe community health nursing approaches and concepts
Describe the roles and responsibilities of community health nursing personnel

- Nursing theories and nursing process
- Epidemiological approach
- Problem solving approach
- Evidence based approach
- Empowering people to care for themselves

  - Concepts of primary health care
    - Equitable distribution
    - Community participation
    - Focus on prevention
    - Use of appropriate technology
    - Multi-sectoral approach

  - Roles and responsibility of community health nursing personnel in:
    - Family health services
    - Information Education and Communication (IEC)
    - Management Information System (MIS)
    - Maintenance of records and reports
    - Training and supervision of various categories of health workers
    - National health programmes
    - Environmental sanitation
    - Maternal and child health
    - Family welfare
    - Treatment of minor ailments
    - School health services
    - Occupational health
    - Organization of clinics, camps: types, preparation, planning, conduct and evaluation
    - Waste management in the center, clinics, etc
    - Disaster management

- Supervised field practice
- Participation in camps
- Group project
Describe and appreciate the activities of community health nurse in assisting individuals and groups to promote and maintain their health.

**Assisting Individuals And Groups To Promote And Maintain Their Health**

- Empowerment for self care of individuals, families and groups in:
  - **A. Assessment of Self And Family**
    - Monitoring growth and development
    - Mile stones
    - Weight measurement
    - Social development
    - Temperature and blood pressure monitoring
    - Menstrual cycle
    - Breast self examination and testicles
    - Warning signs of various diseases
    - Tests: urine for sugar and albumin, blood sugar.
  - **B. Seek Health Services For**
    - Routine health check up
    - Immunization
    - Counseling
    - Diagnosis
    - Treatment
    - Follow up
  - **C. Maintenance of Health Records For Self And Family**
  - **D. Continue Medical Care And Follow Up In Community For Various Diseases And Disabilities**
  - **E. Carryout Therapeutic Procedures As Prescribed/ Required For Self And Family**

| Community health nursing      | 1 week for urban and 4 weeks for rural | Identify community profile  
Identify prevalent communicable and non-communicable diseases  
Diagnose health needs of individual, families and community  
Plan, provide and evaluate care  
Participate in school health programme  
Participate in national health programmes  
Organize groups for self help and involve clients in their own health activities  
Provide family welfare services | ○ Community health survey  
○ Community diagnosis  
○ Family care: home adaptation of common procedures  
○ Home visit: bag technique  
○ Organize and conduct clinics, antenatal, postnatal, well baby clinic, camp etc  
○ Screen, manage and referrals for:  
  ▪ High risk mothers and neonates  
  ▪ Accidents and emergencies  
  ▪ Illnesses: physical and mental disabilities  
○ Conduct delivery at center/home; episiotomy and suturing  
○ Resuscitate new born  
○ School health programme  
○ Screen, manage and refer children  
○ Collaborate with health and allied agencies  
○ Train and supervise health workers  
○ Provide family welfare services: insertion if IUD  
○ Counsel and teach individual, family and community about: HIV, TB, diabetes, hypertension, mental health, adolescents, elderly health, physically and mentally challenged individuals etc | ○ Community survey report – 1  
○ Family care study – 1  
○ Project – 1  
○ Health talk – 1  
○ Case book recording  
○ Observation visit to subcentre, agency for preventing communicable disease, social welfare agency DPHN office and an occupational health centre | ○ Assess clinical performance with rating scale  
○ Evaluation of community survey report, family care study, project and health talk  
○ Completion of activity record  
○ Completion of case book recording |
<table>
<thead>
<tr>
<th>B.Sc Nursing Curriculum</th>

</table>

| Urban | 4 weeks | Provide comprehensive care to individual, family and community | ○ Collect and calculate vital health statistics  
○ Document and maintain:  
  ▪ Individual, family and administrative records  
  ▪ Write reports: center, disease, national health programme/projects | ○ Community survey report – 1  
○ Family care study – 1  
○ Project – 1  
○ Health talk – 1  
○ Case book recording  
○ Observation visit to subcentre, agency for preventing communicable disease, social welfare agency DPHN office and an occupational health centre |

| ○ Asses clinical performance with rating scale  
○ Evaluation of project |

*During the rural posting students should stay in health centers under the supervision of teachers*
# Nursing Research and Statistics

**Placement:** Fourth Year  
**Time:** Theory - 45 Hours (30 + 15)  
Practical - 90 Hours

**Course Description:** The course is designed to enable students to develop an understanding of basic concepts of research, research process and statistics. It is further, structured to conduct/participate in need based research studies in various settings and utilize the research findings to provide quality nursing care. The hours for practical will be utilized for conducting individual/group research project.

NURSING RESEARCH-PRACTICAL

Placement: - Fourth year  
Allotted Hours: 90 hours

AIM

This course is aimed at familiarizing the students with the methodology of conducting a research, thereby able to conduct a research independently.

BEHAVIOURAL OBJECTIVES

On completion of the course, the students will be able to:
- Identify the problem areas.
- State research problems, objectives and hypotheses.
- Identify the variables.
- Prepare review of literature.
- Prepare sample data collection tools
- Conduct a group research project using the steps of data collection.
- Analyze the data collected using statistical packages
- Prepare a project report and submit for evaluation.
- Critically analyze other research studies conducted in the fields of nursing

METHODS OF TEACHING

- Group discussion
- Group presentations

METHOD OF EVALUATION

### Management of Nursing Services In The Hospital And Community

- **Planning:**
  - Hospital and patient care units including ward management
  - Emergency and disaster management

- **Human resource management:**
  - Recruiting, selecting, deployment, retaining, promoting, superannuation etc.
  - Categories of nursing personnel including job description of all levels
  - Patient/population classification systems
  - Patients/population assignment and nursing care responsibilities
  - Staff development and welfare
  - Time management

- **Budgeting:** proposal, projecting requirements for staff, equipment and supplies for
  - Hospital and patient care units
  - Emergency and disaster management

- **Directing and leading:** delegation participatory management
  - Assignments, rotations, delegations
  - Supervision & guidance
  - Implement standards, policies, procedures and practices

MANAGEMENT OF NURSING SERVICES & EDUCATION
PRACTICAL

AIM

The aim of the practical experience is to develop managerial skills needed for the management of nursing educational institutions and nursing service in the hospital.

BEHAVIORAL OBJECTIVES

The student will be able to:

• Prepare organizational chart of an organization
• Outline the duties and responsibilities of various categories of nursing personnel
• Develop skill in management of ward and special units like CSSD, dietary department, house keeping department, intensive care unit
• Apply the knowledge of staffing and scheduling in preparing duty roster for nursing personnel
• Develop leadership skills
• Develop skill in oral and written communication

SKILLS TO BE DEVELOPED

1. Conceptual skill
   • Preparation of organizational chart
   • Preparation of job description
   • Preparation of work plan
   • Plan of assignments for a staff and students
   • Preparation of performa for evaluation of staff
   • Report of duties and responsibilities of night supervisor

2. Communication skills
   • Oral reports
   • Preparation of night report
   • Preparation of day report
   • Maintenance of records

3. Conceptual and technical skills
   • Preparation of duty roster
   • Indenting and inventory control
   • Management of special units like CSSD, dietary department, house keeping and intensive care unit
4. Supervisory and teaching skills
   - Supervision of staff
   - Supervision of students
   - Conduction of nursing rounds, bedside clinics, demonstration
   - Night supervision

List of Assignments

I. PREPARATION OF ORGANIZATION CHART OF
   1. Government Medical College Hospital
   2. Private School of Nursing
   3. Private College of Nursing

II. PREPARATION OF
   1. Duty roster of staff nurses
   2. Proforma for evaluation of staff
      a) Rating scale
      b) Check list
   3. Work plan
   4. Job description of
      a) Nursing superintendent
      b) Head nurse
      c) Staff nurse
      d) Nursing assistant
      e) Various categories of teaching faculty
   5. Oral reports
   6. Day reports
   7. Night reports

III. CONDUCT
   1. Supervision of staff
   2. Supervision of students
   3. Nursing rounds
   4. Bedside clinics
   5. Demonstration

IV. ROLE OF STUDENT ADMINISTRATOR IN
   1. Indenting supplies & materials
   2. Inventory checking
   3. Maintenance of records of /ward

V. Preparation of Budget estimate for the unit/ a specific area
