Course Outline

Software Project and Change Management
SY623C

**COURSE OBJECTIVE**

**Knowledge Level**
- To provide experience in using the concepts, techniques, and decision tools available to project managers.
- To emphasize the importance of system and organizational culture to ensure an integrative project management approach.
- To enlarge a basic understanding of the importance of work breakdown structures and networks to planning, scheduling, and controlling projects.
- To identify different types of organizational structures
- To create an awareness of potential resource conflicts and their importance to meeting project cost and schedule objectives.
- To demonstrate the importance of strategy and prioritizing projects for effective resource allocation and for balancing a portfolio of projects.
- To have a holistic view of projects and their role in the IT sector, with detailed skills in use of project tools and systems found in practice and with a sensitivity to the behavioral issues all project managers must deal with in practice.

**Skill Level**
- To familiarize with project management tools (MS project used here) to manage a software project end-to-end.

**CONDUCT OF THE COURSE**

- The class is intended to be very participatory.
- Case Study/ Presentation.
  - Nominated groups will submit a case study/presentation in which a particular problem is analysed and a contribution made to its solution. Suggested types of case study/presentations include:
  - A case study or story about how managers in a firm could deal with a problem in managing an IT project.
  - A pilot implementation of a new method for managing IT, such as a method for IT planning, requirements determination, evaluation, risk assessment, sourcing, etc.
  - Any other project management topic not covered in the course. See Appendix for suggested topics.
- Presentation Method: A 20 minutes presentation with appropriate media, of the problem, setting, method, results and implications. The final written report along with a copy of the slides being presented will be submitted prior to the presentation.

**REQUIRED COURSE MATERIALS AND READINGS**

**Textbook**

**Reference**
- PMBOK

**Software Tools**
- Microsoft Project Software

**EVALUATION CRITERIA**

- Mid Semester Examination 30%
- Case Study/Presentation 10%
- MS Project Exercise 10%
- Class Participation 10%
- Final Examination 40%

**ACADEMIC DISHONESTY**

- Students are cautioned to avoid all forms of academic dishonesty (any type of cheating that occurs in relation to a formal academic exercise). Due care should be taken to desist from plagiarism i.e. adoption or reproduction of original creations of another author (person, collective, organization, community etc), without due acknowledgment (reference and citation).
- In accordance with the University Code of Academic Misconduct, plagiarism in any form will result in a “F” for this course. Cheating on exams would result in similar penalties.

**TEACHING METHODS, EXPECTATION FROM THE STUDENTS; ATTENDANCE POLICY ETC**

**Teaching Methods**
The classroom activity will consist of lectures and case discussions. Individual/Group assignments and presentations will complement the classroom discussions in enhancing the understanding of the subject.

**Expectation from the Students**
The students are expected to prepare well in advance from the relevant references assigned before attending the sessions to make the classroom activity more meaningful and fruitful. Each student is expected to possess a copy of the prescribed textbook.

**Attendance**
ASB policy on attendance will be applicable for the duration of the course.

**DETAILS OF SESSIONS; TENTATIVE COURSE SCHEDULE**

<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
<td>---------------------------------------------</td>
</tr>
<tr>
<td>2-3</td>
<td>Project evaluation and Programme management</td>
<td>Projects are grouped in to programmes, how the implementation of programmes and projects can be managed so that the planned benefits are achieved, carry out evaluation and selection of projects against strategic, technical and economic criteria, use of cost benefit evaluation techniques for choosing among competing project proposals, evaluate the risk involved in a project and select appropriate strategies for minimizing potential costs.</td>
<td>Hughes, Chapter 3</td>
</tr>
<tr>
<td>4</td>
<td>Project Organization</td>
<td>Alternate organizational structures</td>
<td>PMBOK</td>
</tr>
<tr>
<td>5</td>
<td>An overview of project planning</td>
<td>Approach Project Planning in an organized step by step manner, see where the techniques fit in the overall planning approach, and repeat planning process in more detail for set of activities within a project as it unfolds.</td>
<td>Hughes, Chapter 2</td>
</tr>
<tr>
<td>6</td>
<td>Selection of appropriate project approach</td>
<td>Take account of characteristics of the system to be developed when planning a project and select an appropriate process model.</td>
<td>Hughes, Chapter 4</td>
</tr>
<tr>
<td>7-9</td>
<td>Software effort estimation</td>
<td>Range of estimation methods that can be used, estimate projects using the top down, bottom-up and use case approaches, function points and COCOMO-II approach.</td>
<td>Hughes, Chapter 5</td>
</tr>
<tr>
<td>10-12</td>
<td>Scheduling</td>
<td>Produce an activity plan for a project, WBS, estimate the overall duration of a project, create a precedence network, identify critical path, crashing etc</td>
<td>Hughes, Chapter 6</td>
</tr>
<tr>
<td>13</td>
<td>Risk Management</td>
<td>Identify the factors of project risk, categorize and prioritize actions for risk elimination or containment, Quantify the likely effects of risk on project timescales, PERT technique</td>
<td>Hughes Chapter 7</td>
</tr>
<tr>
<td>14-15</td>
<td>Resource allocation</td>
<td>Identify the resources required for a project, produce a work plan and resource schedule, resource leveling and smoothing</td>
<td>Hughes , Chapter 8</td>
</tr>
<tr>
<td>16</td>
<td>Project Management Plan</td>
<td>Project plan</td>
<td>Jalote, Chapter 8</td>
</tr>
<tr>
<td><strong>d</strong></td>
<td>Monitoring and Control</td>
<td>Monitor the progress of projects, earned value analysis, revise targets to correct or counteract drift, control changes to a projects</td>
<td>Hughes, Chapter 9</td>
</tr>
