There are two types of education: education for living and education for life. When we study in college, striving to become a healthcare professional, a lawyer, or an engineer - this is education for a living. On the other hand, education for life requires understanding the essential principles of spirituality. This means gaining a deeper understanding of the world, our minds, our emotions, and ourselves. We all know that the real goal of education is not to create people who can understand only the language of machines. The main purpose of education should be to impart a culture of the heart - a culture based on spiritual values.
