CURRICULUM
B.Sc Cardiac Perfusion Technology
SPIRITUAL PRINCIPLES IN EDUCATION

“In the gurukulas of ancient rishis, when the master spoke it was love that spoke; and at the receiving end disciple absorbed of nothing but love. Because of their love for their Master, the disciples’ hearts were like a fertile field, ready to receive the knowledge imparted by the Master. Love given and love received. Love made them open to each other. True giving and receiving take place where love is present. Real listening and ‘sraddha’ is possible only where there is love, otherwise the listener will be closed. If you are closed you will be easily dominated by anger and resentment, and nothing can enter into you”.

“Satguru Mata Amritanandamayi Devi”
Introducing AIMS

India is the second most populous nation on earth. This means that India’s health problems are the world’s health problems. And by the numbers, these problems are staggering 41 million cases of diabetes, nearly half the world’s blind population, and 60% of the world’s incidences of heart disease. But behind the numbers are human beings, and we believe that every human being has a right to high-quality healthcare.

Since opening its doors in 1998, AIMS, our 1,200 bed tertiary care hospital in Kochi, Kerala, has provided more than 4 billion rupees worth of charitable medical care; more than 3 million patients received completely free treatment. AIMS offers sophisticated and compassionate care in a serene and beautiful atmosphere, and is recognized as one of the premier hospitals in South Asia. Our commitment to serving the poor has attracted a dedicated team of highly qualified medical professionals from around the world.

The Amrita Institute of Medical Sciences is the adjunct to the term “New Universalism” coined by the World Health Organization. This massive healthcare infrastructure with over 3,330,000 sq. ft. of built-up area spread over 125 acres of land, supports a daily patient volume of about 3000 outpatients with 95 percent inpatient occupancy. Annual patient turnover touches an incredible figure of almost 800,000 outpatients and nearly 50,000 inpatients. There are 12 super specialty departments, 45 other departments, 4500 support staff and 670 faculty members.

With extensive facilities comprising 28 modern operating theatres, 230 equipped intensive-care beds, a fully computerized and networked Hospital Information System (HIS), a fully digital radiology department, 17 NABL accredited clinical laboratories and a 24/7 telemedicine service, AIMS offers a total and comprehensive healthcare solution comparable to the best hospitals in the world. The AIMS team comprises physicians, surgeons and other healthcare professionals of the highest caliber and experience.

AIMS features one of the most advanced hospital computer networks in India. The network supports more than 2000 computers and has computerized nearly every aspect of patient care including all patient information, lab testing and radiological imaging. A PET (Positron Emitting Tomography) CT scanner, the first of its kind in the state of Kerala and which is extremely useful for early detection of cancer, has been installed in AIMS and was inaugurated in July 2009 by Dr. A. P. J. Abdul Kalam, former President of India. The most recent addition is a 3 Tesla Silent MRI.

The educational institutions of Amrita Vishwa Vidya Peetham, has at its Health Sciences Campus in Kochi, the Amrita School of Medicine, the Amrita Centre for Nanosciences, the Amrita School of Dentistry, the Amrita College of Nursing, and the Amrita School of Pharmacy, committed to being centres of excellence providing value-based medical education, where the highest human qualities of compassion, dedication, purity and service are instilled in the youth. Amrita School of Ayurveda is located at Amritapuri, in the district of Kollam. Amrita University strives to help all students attain the competence and character to humbly serve humanity in accordance with the highest principles and standards of the healthcare profession.

I.2. Medium of Instruction:
English shall be the medium of instruction for all subjects of study and for examinations.

I.3. Eligibility:
Generally Science Graduates with Physics, Chemistry, and Biology are eligible for admission to the Under Graduate Courses except in respect of certain specialties for which other qualification or subjects are specifically called for. Essential qualifications for eligibility are mentioned under clause I.1

II. General Rules:
Admissions to the courses will be governed by the conditions laid down by the University from time to time and as published in the Regulations for admissions each year.

II.1. Duration of the Course
Duration details are mentioned under clause No.I.1 of this booklet.

Duration of the course : 4 Years (3 years + 1 year Internship except for courses at serial number 1 and 2 in clause I.1)

Weeks available per year : 52 weeks

Vacation / holidays : 5 weeks (2 weeks vacation + 3 weeks calendar holidays)

Examination (including preparatory) : 6 weeks

Extra curricular activities : 2 weeks

Weeks available : 39 weeks

Hours per week : 40 hours

Hours available per academic year : 1560 (39 weeks x 40 hours)

Internship wherever specified are integral part of the course and needs to be done in Amrita Institute of Medical Sciences, Kochi itself.

II.2. Discontinuation of studies
Rules for discontinuation of studies during the course period will be those decided by the Chairman /Admissions, Amrita School of Medicine, and Published in the “Rules and Regulations” every year.

II.3. Educational Methodology
Learning occurs by attending didactic lectures, as part of regular work, from co-workers and senior faculty, through training offered in the workplace, through read-
ing or other forms of self-study, using materials available through work, using materials obtained through a professional association or union, using materials obtained on students own initiative, during working hours at no cost to the student.

II.4. Academic Calendar

Course will follow an annual scheme as per details mentioned under:

**FIRST YEAR**

Commencement of classes – August 2019  
First sessional exam – November 2019  
Second sessional exam – February 2020  
Model Exam (with practical) – May - June 2020 (one week study leave)  
University exam (with practical) – June - July 2020 (10 days study leave)  
Annual Vacation – 3 weeks after the University examination.

**SECOND YEAR**

Commencement of classes – August 2020  
First sessional exam – January 2021  
Model Exam (with practical) – May - June 2021 (one week study leave)  
University exam (with practical) – June - July 2021 (10 days study leave)  
Annual Vacation – 2 weeks after the University examination

**THIRD YEAR**

Commencement of classes – August 2021  
First sessional exam – January 2022  
Model Exam (with practical) – May 2022 (one week study leave)  
University exam (with practical) – June 2022 (10 days study leave)  
Annual Vacation – 1 week after the University examination.  
Date of completion of third academic year – 31st July 2022

**INTERNSHIP**

Commencement of internship – 01 August 2022  
Completion of internship – 31 July 2023
III. Examination Regulations:

III.1. Attendance:

75% of attendance (physical presence) is mandatory. Medical leave or other types of sanctioned leaves will not be counted as physical presence. Attendance will be counted from the date of commencement of the session to the last day of the final examination in each subject.

III.2. Internal Assessment:

For the first year at least three sessional examinations in theory and preferably one practical examination should be conducted in each subject. The following second/third year shall have one sessional and one model examination.

- The period for sessional examinations of first academic year are as follows:
  - First Sessional Exam: November
  - Second Sessional Exam: February
  - Model Exam: May /June

- The period for sessional examinations of second and third academic year are as follows:
  - Sessional Exam: January
  - Model Exam: May /June

- The last internal assessment examination will be the model examination which shall follow the pattern of the University Examination. Average of best of two examinations and the marks obtained in assignments/viva/practical also shall be taken to calculate the internal assessment.

- A candidate should secure a minimum of 50% marks in the internal assessment in each subject (separately in theory and practical) to be eligible to appear for the University examination.

- Each student should maintain a logbook and record the procedures they do and the work patterns they are undergoing. It shall be based on periodical assessment, evaluation of student assignment, preparation for seminar, clinical case presentation, assessment of candidate’s performance in the sessional examinations, routine clinical works, logbook and record keeping etc.

- Day to day assessment will be given importance during internal assessment, Weightage for internal assessment shall be 20% of the total marks in each subject.
Pre-University examinations (model exam) shall be held three to four weeks prior to the University Examination. Final internal assessment report shall be made available to the Principal ten days prior to the commencement of the university examination.

III.3. University Examinations:

- University Examination shall be conducted at the end of every academic year. A candidate who satisfies the requirement of attendance and internal assessment marks, as stipulated by the University shall be eligible to appear for the University Examination.
- One academic year will be twelve months including the days of the University Examination. Year will be counted from the date of commencement of classes which will include the inauguration day.
- The minimum pass marks for internal assessment is 50% and for the University Examination is 50%. The student should score a total of 50% (adding the internal and external examination (University Examination)) to pass in each subject (separately for theory and practical).
- If a candidate fails in either theory or practical paper, he/she has to reappear for both the papers (theory and practical).
- Maximum number of attempts permitted for each paper is five (5) including the first attempt.
- The maximum period to complete the course shall not exceed 6 years from the date of enrollment for the course.
- All practical examinations will be conducted in the respective clinical areas.
- Number of candidates for practical examination should be maximum 12 to 15 per day.
- One internal and one external examiner will jointly conduct the theory evaluation and practical examination for each student during the final year.

III.4. Eligibility to appear university Examination:

A student who has secured 50% marks for Internal Assessment is qualified to appear for University Examination provided he/she satisfies percentage of attendance requirement as already mentioned at the III (1).

III.5. Valuation of Theory – Revaluation Papers:

1. Valuation work will be undertaken by the examiners in the premises of the Examination Control Division in the Health Sciences Campus.
2. Failed candidates will have the option of revaluation for all the University examinations. Fees for revaluation will be decided by the Principal from time to time.
3. Application for revaluation should be submitted within 5 days (or the time as decided by the Principal) from date of result of examination declared and it should be submitted to the office with payment of fees as decided by the Principal.

### III.6. Supplementary Examinations:

Every main University examination will be followed by a supplementary examination which will normally be held within four to six months from the date of completion of the main examination.

As stipulated under clause No. III.2 under Internal Assessment, HOD will hold an internal examination three to four weeks prior to the date of the University Examination. Marks secured in the said examination or the ones secured in the internal examination held prior to the earlier University Examination whichever is more only will be taken for the purpose of internal assessment. HODs will send such details to the Principal at least ten days prior to the date of commencement of University examination.

Same attendance and internal marks of the main examination will be considered for the supplementary examination, unless the HOD furnishes fresh internal marks and attendance after conducting fresh examination.

Students who have not passed / cleared any subjects in the first University examination will be permitted to attend the second year classes and also eligible to appear for second year university examination along with first year supplementary examination. However, he / she can appear for the third (final) year university examination, only if he / she clear all the subjects in the first as well as in the second year examinations.

Students of supplementary batches are expected to prepare themselves for the University Examinations. No extra coaching is expected to be provided by the Institution. In case at any time the Institution has to provide extra coaching, students will be required to pay fees as fixed by the Principal for the said coaching.

### III.7. Rules regarding carryover subjects:

A candidate will not be permitted to continue the second and third year respectively of the course if he/she has failed in more than 3 subjects in the first or second year university examinations.

A candidate must have passed in all subjects of all the three years to become eligible to undergo compulsory internship of one year. For the candidates who have not passed all the subjects the duration of the third year shall be extended until they become eligible to undergo compulsory internship subject of course to the conditions mentioned under III.3.v &vi of these Rules.
IV. Criteria for Pass in University Examination - Regulations:

IV.1. **Eligibility criteria for pass in University Examination:**

In each of the subjects, a candidate must obtain 50% in aggregate for a pass and the details are as follows:

- A separate minimum of 50% for Internal Assessment.
- 50% in Theory & 50% in Viva.
- A separate minimum of 50% in aggregate for Practicals / Clinics (University Examinations).
- Overall 50% is the minimum pass in subject aggregate (University Theory + Viva + Practicals + Internal Assessment).

IV.2. **Evaluation and Grade:**

1. Minimum mark for pass shall be 50% in each of the theory and practical papers separately (including internal assessment) in all subjects except English.
2. A candidate who passes the examination in all subjects with an aggregate of 50% marks and above but less than 65% shall be declared to have passed the examination in the second class.
3. A candidate who passes the examination in all subjects in the first attempt obtaining not less than 65% of the aggregate marks for all the three years shall be declared to have passed the examination with First Class.
4. A candidate who secures an aggregate of 75% or above marks is awarded distinction. A candidate who secures not less than 75% marks in any subject will be deemed to have passed the subject with distinction in that subject provided he / she passes the whole examination in the first attempt.
5. A candidate who takes more than one attempt in any subject and pass subsequently shall be ranked only in pass class.
6. A Candidate passing the entire course is placed in Second class / First class / Distinction based on the cumulative percentage of the aggregate marks of all the subjects in the I, II and III (Final) university examinations.
7. Rank in the examination: - Aggregate marks of all three year regular examinations will be considered for awarding rank for the B.Sc Graduate Examination.

V. Internship:

V.1. **Eligibility for Internship - Regulations:**

Wherever internship is a part of the curriculum, students will have to do the internship in Amrita Institute of Medical Sciences, Kochi itself. A candidate must have passed in all subjects to become eligible to undergo compulsory internship of one year or a period fixed in the curriculum.
“Internship has to be done continuously for a period provided in the syllabus except in extra ordinary circumstances where subject to the approval of the Principal the same may be done in not more than two parts with an interruption not exceeding six months. In any case Internship shall be completed within 18 months from the date of acquiring eligibility to do the internship.

The students will be posted in Amrita Institute of Medical Sciences, Kochi and Amrita Institute of Medical Sciences, Faridabad, if necessary, during final year and internship period.

**V.2. Attendance and leave details during Internship:**

For 30 days of duty an intern will be eligible for casual leave and weekly off. A Student will become eligible to receive his/her degree only after completion of internship to the complete satisfaction of the Principal.

**VI. General considerations and teaching / learning approach:**

There must be enough opportunities to be provided for self learning. The methods and techniques that would ensure this must become a part of teaching-learning process.

Proper records of the work should be maintained which will form the basis for the students assessment and should be available to any agency who is required to do statutory inspection of the school of the course.

**VII. Project:**

Each student should submit a project in consultation with HOD and guidance under Project Guide, 3 months prior to their final year university exam. The student will be eligible to appear for the final year examination only after submission of the project.

**VIII. Maintenance of Log Book**

a. Every graduate student shall maintain a record of skills he/she has acquired during the training period certified by the various Heads of Departments/Program Coordinator under whom he/she has undergone training.

b. In addition, the Head of the Department shall involve their graduate students in Seminars, Journal Club, Group Discussions and participation in Clinical, Clinical-Pathological meetings.

c. The Head of the Departments/Program coordinator shall scrutinize the log-book in every month.

d. At the end of the course, the student should summarize the contents and get the log book certified by the Head of the Department.

The log book should be submitted at the time of practical examination for the scrutiny of the Board of Examiners.
Part II
Syllabus
INTRODUCTION AND ADVANCEMENT OF THE PROGRAM

Cardiovascular perfusion is the science of providing extracorporeal circulation in order to artificially support and temporarily replace a patient’s respiratory and circulatory systems. Clinical Perfusionists are expert members of the cardiac surgical team, and can be found to provide life saving support of patients requiring extra corporeal circulation, including but not limited to major cardiothoracic, vascular and transplant surgeries, as well as support of the critically-ill patient.

Cardiovascular Perfusionists are important members of the open-heart surgical team whose primary role is to conduct cardiopulmonary bypass using a heart-lung machine and other ancillary equipment. They closely monitor the patient’s blood flow and other vital signs during open heart surgery and are also responsible for administering intravenous fluids, blood products and anesthetic drugs. Perfusionists are also experts of other life support equipment such as ventricular assist devices and intraaortic balloon pumps.

The primary aim of B.Sc Cardiac Perfusion Technology is to academically and clinically prepare the cardiovascular perfusion student for professional practice. The curriculum focuses on developing a strong knowledge base in cardiothoracic anatomy, physiology and pathophysiology, as well as pharmacology, fetal and neonatal cardiac development and perfusion science. At the end of three years the candidates will have to pass the University examination to be eligible for the bachelor degree. Upon completion of the 3-year course and one year internship the candidates will evolve into a full trained, qualified cardiac perfusion technologist capable of working independently. Throughout the program, the students are given ample opportunities to develop their critical thinking and problem solving skills.

MAIN OBJECTIVES OF THE PROGRAM

The primary aim of our B.Sc in Cardiovascular Perfusion is to academically and clinically prepare the cardiovascular perfusion student for professional practice. The curriculum focuses on developing a strong knowledge base in cardiothoracic anatomy, physiology and pathophysiology, as well as pharmacology, fetal and neonatal cardiac development and perfusion science. Throughout the program, the students are given ample opportunities to develop their critical thinking and problem solving skills.
COURSE STRUCTURE

First year

Theory classes and practicals of following subjects

- Anatomy
- Physiology
- Biochemistry
- Microbiology
- Introduction to Computer application
- Quality Assurance & Accreditation
- English & Soft Skills

Second year

Theory class and posting in the clinical area

- Pharmacology
- Pathology
- Applied Basic Sciences
- Basics of Cardiopulmonary Bypass

Third year

Theory class and posting in the clinical area

- Cardiac Perfusion Technology – Clinical
- Cardiac Perfusion Technology – Applied
- Cardiac Perfusion Technology - Advanced

Fourth Year

Fourth year is internship in the clinical area
FIRST YEAR

During the first year the students will have didactic lecture in the medical college from 9 am to 4 pm

Internal Assessment

Three sessional examinations will be conducted in this year. Average marks of these sessional examinations will be counted as internal marks.

**************************************************

Paper I – ANATOMY

COURSE OBJECTIVE:
An outline of anatomy with special emphasis on applied aspects is provided to the students for better understanding of the technical and diagnostic procedure.

1. The human body as a whole 1 hour
   Definition
   Sub divisions of anatomy
   Terms of location and positions
   Fundamental planes, Vertebrate structure of man
   Organization of body cells and tissues

2. Locomotion and Support 8 hours
   The Skeletal System
   Types of bones
   Structure and growth of bones
   Divisions of the skeleton
   Appendicular skeleton, Axial skeleton
   Name of all the bones and their parts
   Joints: Classification, Types of movements with examples
   Muscles: Structure, classification, muscles of abdominal wall, muscles of Respiration, pelvic diaphragm, muscles of head and neck

Practicals: 2 hours
   Demonstrations of all bones:
     Showing parts
     Joints, X-rays of all normal bones and joints
   Muscles: Classification of muscle

3. Anatomy of nervous system 6 hours
   Introduction and divisions of nervous system
   Central nervous system: Spinal chord, Anatomy, and functions, Reflex arc
   The Brain:
   Location, gross features, parts, functional areas
   Hindbrain, Midbrain, fore brain
Coverings of brain and peripheral nervous system
Anatomy of cerebral blood supply & coverings
Spinal cord – gross features, extent, blood supply and coverings
Injuries to spinal cord and brain
Peripheral nervous system – organization & structure of a typical spinal nerve

**Practicals:** 1 hour
Demonstration of brain and spinal chord

4. **Anatomy of Cardiovascular system**
Gross anatomy & Structural features of the Heart and Great vessels:
Heart 2 hours
Location, size, surface features, pericardium & valves
Right Atrium: structural features
Venous area, Septum and atrial appendage
Right Ventricle: structural features, inflow & out flow characteristics
Left Atrium: structural features, venous area, Septum and appendage
Left ventricle: structural features, inflow & out flow characteristics
Valves: valve apparatus, location
Structure & functions of each valve
Blood Supply of heart: coronary arteries, cardiac cycle
Innervations: sympathetic and parasympathetic sensory
Pulmonary circuit: names of the arteries and veins & positions
Lymphatic drainage of the Heart

**Great Vessels** 2 hours
Structure of blood vessels and its organization
Aorta
Pulmonary artery & pulmonary vein
General plan of systemic circulation
Pulmonary circulation

**PRACTICALS** 2 hours
Demonstration to illustrate normal angiograms
Demonstration of surface features & interior of the heart
Demonstration of aorta and its branches
Histology of cardiac muscles and artery

5. **Anatomy of the Respiratory system** 4 hours
Organs of Respiratory System:
Conducting portion, respiratory portion
(Nose – nasal cavity, paranasal air sinuses
Larynx, trachea, bronchial tree)
Muscles of Respiration
Cross structure and the interior features of nose & nasal cavity
Para nasal air sinuses
Cross structure and interior features of the pharynx and larynx
Cross structures and interior features of the trachea and bronchial tree
Gross structure, histology, position and coverings of the lungs
Pulmonary circulation – pulmonary arteries pulmonary veins & bronchial arteries
Nerve supply to the respiratory system

**Practicals**  
Demonstration of the parts and function
Demonstration of the different parts of the respiratory system with special emphasis On lungs
Histology of lungs

**6. Anatomy of the digestive system**  
Components of the digestive system
Alimentary tube
Mouth, tongue, tooth
Salivary gland, liver, biliary apparatus and its secretion, pancreas and pancreatic secretion, movements of intestine defecation, GI hormones, malabsorption and

**Practicals**  
Demonstrations of the parts and functions
Normal x-rays

**7. Anatomy of excretory system & Reproductive system**  
Organization of the renal system
Kidneys: location, gross features, structure, blood supply and nerve supply
Excretory ducts, ureters, urinary bladder, urethra location gross features and structure

**Male reproductive system:**  
Testis, Duct system, Prostate

**Female Reproductive system:**  
Ovaries, duct system, accessory organs

**Practicals**  
Demonstration of Kidneys, ureter, bladder
Histology of kidney

**8. Anatomy of endocrine system**  
Name of all endocrine glands and their positions
Hormones and their functions

**9. Histology**  
General Slides:

**Systemic Slides**  
4. G.I.T
5. Lung-Trachea
6. Kidney, Ureter, Urinary bladder  
7. Endocrine- Adrenal, pancreas, pituitary, thyroid and parathyroid  
8. Uterus, Ovary, testis

Reference books:

Human Anatomy- Regional and Applied Volume  
B.D Chaurasia

Clinical Anatomy For Medical Students  
Richard S.Snell

********************************************************************

Paper II – PHYSIOLOGY

1. INTRODUCTION TO PHYSIOLOGY AND GENERAL PHYSIOLOGY - 1 hr

2. MUSCLE and NERVE - 3 hrs
   - Neurons and glial cells - Structure, function, Types, electrical property, degeneration and regeneration.
   - Muscle- Structure & Functions of skeletal muscle & smooth muscle
   - Neuromuscular transmission – Functional anatomy, Transmission & Clinical importance.

3. HAEMATOLOGY - 9 hrs
   - Fluid compartments, Composition & functions of blood, Plasma protein – names, functions.
   - Leucocytes - Morphology, Types, Properties & Functions, variations in count.
   - Thrombocytes- Morphology, Count, Function, Variations.
   - Blood groups and its importance, Blood transfusion.
   - Tissue fluid and Lymph
   - Immunity.

4. CARDIOVASCULAR SYSTEM - 10 hrs
   - Organisation of CVS, Properties of Cardiac Muscle, Origin and spread of cardiac impulse
   - Cardiac Cycle – Electrical (ECG) and mechanical events,
   - Cardiac output, Measurement, (Fick’s Principle) regulation
   - Blood pressure, measurement & variation, determinants, regulation, Shock.
   - Regional circulation.(Salient features only)-coronary, Pulmonary, Cerebral, Cutaneous

5. RESPIRATORY SYSTEM - 8 hrs
- Alveolar ventilation, Dead space, Ventilation perfusion ratio and its significance,
- Spirogram
- Diffusion of gases, O₂ transport, CO₂ transport.
- Regulation of respiration – Voluntary, Neural, Chemical.
- Abnormalities of respiration Hypoxia, Cyanosis, Dyspnea, Asphyxia, High altitude,
- Dysbarism.

6. DIGESTIVE SYSTEM - 7 hrs
- Functional anatomy of GI tract,
- Secretions - Salivary secretion & its regulation, Gastric secretion and its regulation,
- Peptic ulcer, Pancreatic secretion and its regulation, Functions of liver. Bile – storage and functions. Intestinal juice
- Movements - Mastication, Deglutition, Movements of stomach, Small intestine, Large intestine. vomiting, Defecation.
- GI Hormones,
- Digestion & Absorption of carbohydrates, Proteins, Fat & vitamins

7. Excretion - 7 hrs
- Functional anatomy of kidney, Structure and function of kidney and nephron
- Renal blood flow, Glomerular filtration rate, Definition, Measurement and factors
- affecting Tubular functions – Reabsorption, Secretion, Acidification, concentration and abnormalities.
- Micturition – Bladder innervation, Micturition reflex.
- Functions of skin

8. ENDOCRINOLOGY - 6 hrs
- Introduction to endocrinology (Different glands, hormones)
- Pituitary gland ( Anterial and posterior glands, actions and applied aspects.
- Thyroid gland (Actions and applied aspects)
- Calcium homeostasis (Parathyroid, Vitamin D, Calcitonin, actions and applied aspects
- Pancreas (Endocrine part – insulin, glucagon – actions and applied aspects
- Adrenal cortex and medulla (Actions and applied aspects)

9. REPRODUCTIVE SYSTEM - 3 hrs
   a) Male Reproductive System- Different parts, spermatogenesis, hormones
   b) Female reproductive system – Different parts, Sexual cycles – Menstrual cycles – Ovarian, endometrium
   c) Lactation, Pregnancy & Contraception (Basics only)

10. CENTRAL NERVOUS SYSTEM (Basics only) - 10 hrs
- Organization of Nervous system.
- Synapse, Properties & Function
- Reflexes, Reflex action, Property ,Function.
- Sensory system – Receptor, Ascending sensory pathway (basics only), Thalamus, sensory cortex
• Motor System – Spinal control of Motor activity, Motor areas in Cerebral Cortex,  
• Pyramidal & extra pyramidal tracts (basics only),  
• Basal ganglia & Cerebellum.  
• Hypothalamus  
• Autonomous nervous system  
• Cerebro spinal fluid- formation and functions.

11. SPECIAL SENSES (Basics only) - 4 hrs  
a) Audition  
b) Vision

Revision and evaluation session – 4-5 hours

Reference books:

Essentials of Medical Physiology  
Anil Baran Singh Mahapatra

********************************************************************

Paper III – BIOCHEMISTRY

I. CELL STRUCTURE & FUNCTIONS 1hr  
• Mitochondria  
• Endoplasmic reticulum, Lysosomes  
• Fluid mosaic model for membrane structure

II. DIGESTION AND ABSORPTION OF NUTRIENTS 2hrs  
1. Digestion of carbohydrates  
2. Fats  
3. Enzymes in digestion of proteins

III. ENZYMES 1hr  
• Normal serum range and diagnostic importance of serum AST, ALP,ALT,CK,GGT and AMYLASE.

IV. PROTEINS 1hr  
• Essential amino acids  
• Plasma proteins  
• Immunoglobulins

V. CARBOHYDRATES 2hr  
• Diabetes mellitus- symptoms and complications  
• Glucose tolerance test  
• Action of insulin and glucagon on carbohydrate metabolism
VI VITAMINS 2hrs
- Deficiency manifestations of Vitamin A, C, D, E, K
- Vit B Complex

VII MINERALS 1hr
- Factors maintaining serum calcium level and important functions of calcium
- Importance of trace elements

VIII HEMOGLOBIN 1hr
1. Hemoglobin metabolism

IX LIVER FUNCTION TESTS 1hr
- Jaundice and types of jaundice
- Enzymes in liver disease

X RENAL FUNCTION TESTS 1hr
- Serum Creatinine

XI SPECIALIZED LABORATORY INVESTIGATIONS 1hr
Principle and applications of
- Radioimmunoassay (RIA)
- ELISA
- Colorimetry

XII LIPIDS 1hr
- Essential fatty acids (EFA)
- Poly unsaturated fatty acids (PUFA)
- Phospholipids

XIII METABOLISM 1hr
- TCA cycle (steps only)

XIV MAINTENANCE OF HOMEOSTASIS 1hr
- Plasma buffers
- Renal mechanisms in pH regulation
- Anion gap
- Metabolic acidosis,

XV NUCLEIC ACIDS 1hr
- DNA and RNA
- Purine and pyrimidine bases,

XVI CANCER 1hr
- Chemical and physical carcinogens
- Tumor markers.

**Paper V – Section B: QUALITY ASSURANCE AND ACCREDITATION**

**Course Objectives:**

Modernization and its brand conscious make an organization thrive towards perfection in the comparative world of business. The underlying factor that allows an organization to stand the test of time is quality. The students are given the working knowledge of the subject.

**Course Content:**

<table>

Suggestion scheme, TPM, Kanban, - 2 hrs
JIT, Zero defect programme - 2 hrs
ISO - 4 hrs
Quality management system Quality manual - 4 hrs
Quality procedures - 4 hrs
Quality records - 4 hrs
Quality audit - 4 hrs
Corrective and preventive action - 2 hrs
SQC (Statistical Quality Control techniques) - 2 hrs
Cost effectiveness - 2 hrs
Cost of quality system - 2 hrs
Benefit in total cost - 4 hrs
Cost measuring system - 4 hrs
TQM- Concept, awareness, aspects training - 4 hrs
Total - 80hrs

Detailed Course Plan

Unit- I
Introduction to quality –Definition, concept, Benefits-Functions-Design- Formulation-
Standardization

Unit-II
Implementation –Factors affecting quality –Need for Quality Cycle –Quality objectives- Quality policy

Unit-III
Quality measurable –Quality Control Quality Standards. Q C Tools –NABH, NABL, JCI~Quality Documents, QC Records. Kaizen Technique such as Market-in, TQC .Q C
Circles –Suggestion scheme. TPM, Kanban –JIT, Zero defect programmes

Unit-IV
ISO- Quality management system- Quality manual-Quality procedure- Quality rec-
ords- Quality audit

Unit- V
Corrective and preventive action –SQC (Statistical Quality Control technique)
Cost effectiveness- Cost of quality system- Benefit in total cost –Cost
Measuring system- TOM- concept, awareness, aspects training

**Soft Skills**

1. **Introduction to Soft Skills**
   - What are Soft Skills?
   - Why is Soft Skills necessary in the modern age?
   - Significance of Soft Skills in the medical profession.
- Topics to be covered in the Soft Skills training program.

2. Interpersonal Skill
   - What is an Interpersonal Skill?
   - What is the significance of having a good Interpersonal Skill in a medical profession?
   - How can we develop our Interpersonal Skills through Empathic listening and building trust?

3. Communication Skill
   - The process of communication
   - Barriers to communication
   - Verbal communication and Non-verbal communication
   - Role of perception in communication

4. Time Management
   - Value of time, setting goals/planning and prioritization.
   - Check the time killing habits
   - Procrastination
   - Tools of time management – Time Management Matrix as explained by Dr. Stephen R Covey

5. Goal Setting
   - Concept of goal setting
   - Personal values and Personal goals
   - Six areas of goal setting
   - The process of goal setting : SMART goals
   - How to set SMART goals

6. Stress Management
   - What are the causes of stress and different types of stressors
   - Identifying the stressors in an individual
   - Process of stress
   - What are the effective ways of managing stress?

7. Emotional Intelligence
   - The concept of Emotional Intelligence
   - The components of Emotional Intelligence
   - The different models of Emotional Intelligence
   - Emotional Intelligence for leadership.
8. **Listening skill**
   - The concept of listening and its significance in the communication process
   - Why listening skill is important in the medical profession
   - Different types of listening
   - How to become an effective listener

9. **Being Proactive**
   - The concept of being proactive
   - The Importance of being proactive in life
   - The stimulus – response model of being proactive – Dr. Stephen R Covey
   - Circle of concern and Circle of Influence – Dr. Stephen R Covey
   - Developing the Proactive language in life

10. **Presentation Skill**
    - The process of presentation skill
    - Adult learning principles
    - Preparation and planning for presentation
    - How to effectively deliver a presentation
    - Effective use of voice and body language
    - Effective use of visual aids,
    - Do’s and Don’ts of presentation

11. **Group discussion**
    - The significance of a group discussion round in an interview – Different skills of an individual that are tested in a group discussion.
    - Do’s and Don’ts in a group discussion.

12. **Interview Skills**
    - What is the purpose of Job Interview?
    - What are the different types of Job Interview?
    - Do’s and Don’ts of an Interview
    - Effective Resume preparation
    - Dressing and Grooming for an Interview
    - Self Introduction
    - Extempore practice

********************************************************************
SECOND YEAR

During the second year the students will be posted in the clinical area from 8 am to 5 pm (Depending on the OT schedule) and regular didactic lectures.

Internal Assessment

One sessional examination and one model examination will be conducted in this year. Average marks of these two examinations will be counted as internal marks along with performance in the clinical posting.

********************************************************************

Paper VII – PHARMACOLOGY

1. General Pharmacology – 4 hours
2. Evaluation of drugs in man, drug prescribing and drug interactions – 3 hours
3. Sedatives, hypnotics and pharmacotherapy of insomnia – 1 hour
4. Drugs effective in convulsive disorders – 1 hour
5. Opioid analgesics – 1 hour
6. Analgesic – antipyretics and non-steroidal anti-inflammatory drugs – 1 hour
7. Psychopharmacology – 1 hour
8. Drug therapy of parkinsonism and other degenerative disorders of the brain – 1 hour
9. Local anesthetics – 1 hour
10. Adrenergic and adrenergic blocking drugs – 1 hour
11. Histamine and anti histaminic drugs – 1 hour
12. Pharmacotherapy of cough – 1 hour
13. Pharmacotherapy of bronchial asthma and rhinitis – 1 hour
14. Digitalis and pharmacotherapy of cardiac failure – 1 hour
15. Vasodilator drugs and pharmacotherapy of angina pectoris – 1 hour
16. Pharmacotherapy of hypertension – 1 hour
17. Drugs and blood coagulation – 1 hour
18. Drugs effective in iron deficiency and other related anemias – 1 hour
19. Diuretics – 1 hour
20. Emetics, drug therapy of vomiting, vertigo and diarrhea – 1 hour
21. Pharmacotherapy of constipation – 1 hour
22. Pharmacotherapy of peptic ulcer – 1 hour
23. Sulfonamides, Trimethoprim, cortimoxazole, nitrofurans and quinolones – 1 hour
24. Penicillins and antibiotics effective mainly against gram positive organisms – 1 hour
25. Aminoglycosides and other antibiotics effective mainly against gram negative organisms – 1 hour
26. Antibiotics effective against both gram positive and gram negative organisms – 1 hour
27. General principles of chemotherapy of infections – 1 hour
28. Chemotherapy of urinary tract infections – 1 hour
29. Antiseptics, disinfectants and insecticides – 1 hour
30. Thyroid and antithyroid drugs – 1 hour
31. Insulin and antidiabetic drugs – 1 hour
32. Adrenal cortical steroids – 1 hour
33. Vitamins and antioxidants – 1 hour
34. Drugs, pregnancy and the newborn – 1 hour

Reference books:
- Essentials of Medical Pharmacology
  Tripathi
- Basics and Clinical Pharmacology
  Katzung

********************************************************************

Paper VIII – PATHOLOGY

1. Introduction to Pathology 3 hrs
   - Histopathology- Methods and techniques
   - Cytology-FNAC, Exfoliative advantages and limitations of cytology
   - Hematology-Sample collection.
   - Immunohistochemistry, Immunofluorescence, Electron microscopy, Flow cytometry

2. Cell injury & adaptations 1 hr
   - Etiology
   - Reversible & Irreversible cell injury
   - Necrosis & Apoptosis
   - Gangrene - Dry - Wet
   - Atrophy, Hypertrophy, Hyperplasia, Metaplasia, Dysplasia.
     Fatty change

3. Inflammation & Repair 2 hrs
   - What is inflammation
   - Signs of inflammation, Acute and chronic inflammation, Types of inflammation, Giant cells, Macrophages, Ulcer, abscess, Acute inflammation, Systemic effects of acute inflammation
   - Factors affecting healing- Complications of healing

4. Hemodynamic Disorders 2 hrs
- Definition of edema and causes of edema
- Exudate and transudate

Shock – Definition and types of shock
Thrombosis
Emboli - Definition and types of emboli, Pulmonary thromboembolism

5. Neoplasia 2 hrs
- Definition
- Difference between benign and malignant cells, Nomenclature of tumors
- Routes of metastasis of tumors, Staging of tumors, Etiology of cancers
- Diagnosis of cancer, including tumor markers

6. CVS 1 hr
- Definition of Ischaemia, Infarction, Aneurysm
- Rheumatic heart disease, Infective endocarditis, Atherosclerosis
- Myocardial infarction, Hypertension and pericardial effusion

7. Respiratory system 1 hr
- Tuberculosis, Pleural effusion, Pneumonia, COPD and tumors

8. GIT 1 hr
- Peptic ulcer, Carcinoma of oesophagus, Stomach & Colon,
- Inflammatory bowel disease (UC & Crohns)

9. Liver and GB 1 hr
- Hepatitis, Cirrhosis, Tumours of liver
  - Cholecystitis and GB calculi

10. Renal 1 hr
- Glomerulonephritis & Pyelonephritis
- Renal calculi - Nephrotic syndrome, Renal tumors, Polycystic renal diseases-

11. MGS 1 hr
- Cryptorchidism, Orchitis, epididymitis, Prostatic hyperplasia
- Carcinoma penis, Testicular tumors
12. FGS & Breast 1hr
Ovarian tumours,- Fibroid- Carcinoma cervix- Carcinoma endometrium pap smear Fibroadenoma breast, Carcinoma Breast-Predisposing factors & TNM

13. CNS 1hr
- Meningitis & encephalitis.- Alzheimer’s disease,
  Tumours - Meningioma, Gliomas, Metastasis
  CSF collection, indication and contraindication, tests performed, cytocentrifuge

14. Skin & soft tissue 1hr
  Skin- SCC, Melanoma,BCC inflammatory lesions lipoma,

15. Bone 1hr
  Osteoporosis, Osteomyelitis,Rickets ,Osteomalacia
  Tumours – Osteosarcoma, Osteoclastoma , Ewings sarcoma & Arthritis

16. Endocrine 1hr
  Organs, Pituitary, Adrenal brief; Thyroid – Goitre thyroiditis and tumours
  Diabetes and its complications

17. Anaemias - Types of anaemia 1hr

18. WBC disorders 1hr
  Non neoplastic and neoplastic

19. Lymphoreticular system- Lymphadenitis, Lymphomas 1hr

20. Platelet and coagulation abnormalities-Primary & Secondary Hemostasis 2hrs

21. Clinical Pathology I Blood collection, anticoagulants used,vacuetttes and their color code.complete hemogram and the various parameters ,Bone marrow – Indication of BM study & collection procedure, PT ,APTT sample collection 1hr

22. Clinical Pathology II 1hr
  Urine analysis –Physical,Chemical, microscopic,
  Dipstick parameters
23 Transfusion Medicine - Blood grouping, cross matching, Screening of donor, Precautions to take when you start blood transfusion, Monitoring during transfusion, Transfusion reactions, Blood components. 1Hr

Internal assessment  Exam -1 ½ hrs

Lab visit: Histopathology lab-1hr
Hematology lab & blood bank:1 hr
Cytology lab:1hr

Total Hours: 29 hrs lecture+3hrs exam+3 hrs lab visit=35 hrs

Reference Books:

Basic Pathology: An introduction to the mechanisms of disease
Sunil R Lakhani, Susan A Dilly, Caroline J Filayson

**************************************************************************************************************

Paper IX: APPLIED BASIC SCIENCES

Applied Anatomy

Anatomy of Heart:
1  Surface anatomy,
2  Gross anatomy, cardiac chambers, septa, valves,
3  Pericardium

Arteries, Veins, Lymphatics
- Aorta and branches
- Venous drainage
- Pulmonary vessels and circulation
- Coronary circulation and coronary venous drainage

Conduction System of Heart

Applied Physiology

1  Normal Cardiac Cycle
2  Cardiac output
3  Blood pressure
4  ECG and Cardiac Cycle
5  Arterial, Venous Pressures and Wave Forms
6  Flow, pressure and resistance
Applied Microbiology

1. Fundamentals of infection control
2. Fumigation and antiseptics
3. Sterilization in clinical practice
4. Sterilization procedures
5. Disposal of biological and non biological waste from the lab

Applied Pharmacology

Intra Venous Fluids: Crystalloids, Colloids

Common Cardiac Drugs – PART-I: Digoxin, Diuretics, Vasodilators, Nitrates

Common Cardiac Drugs – PART-II: Beta Blockers, Calcium Blockers, ACE inhibitor

Common Cardiac Drugs – PART-III: Antiarrhythmic drugs, Positive inotropic drugs

Heparin, Protamine

******************************************************************************

PATHOLOGY AND PATHOPHYSIOLOGY

• Coronary artery disease and myocardial infarction
• Rheumatic Fever
• Valvular Heart Disease
  1. Mitral stenosis
  2. Mitral regurgitation
  3. Aortic stenosis
  4. Aortic regurgitation
  5. Tricuspid valve disease
  6. Combined valve diseases
  7. Congenital Heart Disease:
     8. Acyanotic ,Cyanotic
  9. Shunts
 10. Left to Right Shunts
 11. Right to Left Shunts
 12. Heart Failure

******************************************************************************

Paper X  BASICS OF CARDIOPLUMONARY BYPASS

Historical development of Cardiopulmonary Bypass
  Hypothermia
  Controlled cross circulation
  Development of Oxygenators
Hemodilution
Oxygen saturation and Oxygen transport
Diagnostic measures
Blood pumps
Blood gas management
Circuits for CPB
Cannula and Cannulation for CPB
Preparation for CPB
Checklist for CPB

------------------------------------------------------------------------------------------------------------------

THIRD YEAR

During the second year the students will be posted in the clinical area from 9 AM to 3 PM and one hour didactic lecture from 3 PM to 4 PM.

Internal Assessment

One sessional exam and one model examination will be conducted in this year. Average marks of these examinations will be counted as internal marks along with performance in the clinical posting.

********************************************************************

Paper XI: CARDIC PERFUSION TECHNOLOGY – CLINICAL

- Pharmacokinetics and Pharmacodynamics of Cardiopulmonary bypass
- Drugs (including anesthetic drugs) used in cardiopulmonary bypass
- Conduct and monitoring of Cardiopulmonary bypass
- Adequacy of perfusion – General considerations, specific aspects of perfusion, monitoring, other concomitants which may affect its adequacy
- Pulsatile perfusion – Introduction, theory & physiology of pulsatile flow, hemodynamic, metabolic effects, Clinical use, hematological effects
- Cannulation techniques during cardiopulmonary bypass
- Termination of cardiopulmonary bypass – principles and methodology
- Myocardial protection and cardioplegia- pretreatment of the Myocardium, cardioplegia, hypothermia, controlled reperfusion, myocardial protection for specific clinical problems, Complications of cardioplegia. Non cardioplegic methods during cardiac surgery on cardiopulmonary bypass
- Oxygenation – general consideration, bubble & membrane (including assessment and comparison of oxygenator function)
- Heat exchangers-principles function of heat exchangers & their assessment. Complications related to heat exchange and their management
- Priming fluids and hemodilution
Paper XII: CARDIAC PERFUSION TECHNOLOGY – APPLIED

- Blood cell trauma – analysis of forces of fluid motion, effects of physical forces of blood cell, clinical effect. Complications of blood transfusion.
- Anticoagulation on bypass, its monitoring, its reversal and complications. Heparinless bypass. Platelet aggregation and platelet dysfunction. Coagulopathies due to cardiopulmonary bypass and its management.
- Inflammatory response to cardiopulmonary bypass & its clinical effects. Methods to minimise the same. Immune response, neuroendocrine, renal, metabolic splanchnic response, pulmonary response and electrolyte response to cardiopulmonary bypass
- Blood conservation hemofiltration & dialysis during cardiopulmonary bypass including modified ultra filtration reverse autologous priming and other methods
- Micro emboli- gaseous and particulate, filters used in cardiopulmonary bypass circuit.
- Micro pore filtration during cardiopulmonary bypass Counter pulsation techniques and assist devices

Paper XIII: CARDIAC PERFUSION TECHNOLOGY – ADVANCED

- Perfusion techniques for Paediatric cardiac surgery
- ECMO- special perfusion techniques for special cardiac surgeries and medical conditions (including thoracic aortic surgeries deep hypothermia and circulatory arrest). Perfusion for non cardiac surgery, invasive cardiology and outside the operation suite.
- Perfusion as a method of cardiopulmonary bypass
- Complications and safety during cardiopulmonary bypass – bypass safety, organizational aspects, accidents, coagulopathies, mechanical and electrical failures, perfusion management, perfusion systems, safety for the perfusionist and surgical team management of perfusion accidents.
- Minimally invasive surgery and the perfusionist
- Recent advances in perfusion techniques
- Experimental perfusion
FOURTH YEAR

Internship

Description:

One-year compulsory internship in various clinical areas in Amrita Institute of Medical Sciences during which the students get to hone their skills and knowledge acquired in the three years of rigorous study. During this period their work is very similar to what is expected from them after the completion of their training. The training ensures their readiness to approach a patient in any setting.

Eligibility:

Student who has successfully completed his/her theory and practical in the first three years of the programme.

Duration:

One year (compulsory Internship) at Amrita Institute of Medical Sciences.
### SCHEME OF EXAMINATION

B.Sc Cardiac Perfusion Technology Degree Examination
Distribution of Marks for each subject

PATTERN OF QUESTION PAPERS

**Paper I to Paper IV and VII & VIII**
The duration of each theory paper will be three hours; the paper will have only one section for a total of 70 marks.

**Pattern of Question Paper**
- Structured Essay (2 out of 3) - 30 marks (2 x 15 marks)
- Short Notes (5 out of 6) - 25 marks (5 x 5 marks)
- Short answer question (5 out of 7) - 15 marks (5 x 3 marks)

**Total Marks** - 70 marks

**Paper V (English)**
The duration of the paper will be three hours; the paper will have two sections (Section A & Section B) each carrying 50 marks and a total of 100 marks.

**Pattern of Question Paper**
- Structured Essay (2 out of 2) - 20 marks (2 x 10 marks)
- Short Notes (3 out of 4) - 15 marks (3 x 5 marks)
- Short answer question (5 out of 7) - 15 marks (5 x 3 marks)

**Total Marks** - 50 marks

**Paper VI**
The duration of Paper V will be two hours; the paper will have only one section for a total of 50 marks.

**Pattern of Question Paper**
- English Grammar - 20 marks
- English Writing - 30 marks

**Total Marks** - 50 marks

**Paper IX to Paper XIII**
The duration of each theory paper will be three hours; the paper will have only one section of 100 marks.

**Pattern of Question Paper**
- Structured Essay (2 out of 2) - 30 marks (2 x 15 marks)
- Short Answer Question (10 out of 12) - 70 marks (10 x 7 marks)

**Total Marks** - 100 marks
