

## Courses of Amrita get Cusat recognition

**Kochi, July 29:** The Amrita Institutions, the leaders in IT, health-care and management studies in the State, have crossed yet another milestone by securing the recognition of the Cochin University of Science and Technology for its three PG courses. The courses recognised by Cusat are MSc (hospital management), MSc (computer science) and PG diploma in computer hardware.

“The recognition came after the academic commit-

tee of the university held a rigorous process of appraisal of the faculty resources, infrastructure and academic standards. This collaboration will lead to significant burgeoning of inner-institutional, multi-disciplinary learning and research,” hoped Amrita Institutions Director Dr U Krishna Kumar.

“We have also submitted a proposal to recognise five other courses for the next academic year,” he added.
