## <sup>JUL</sup> 11 IIT Mumbai, Amrita University trains college teachers

The Indian Institute of Technology – Mumbai along with HRD Ministry and Kerala based Amrita University has trained over 3500 college teachers from different parts of the country through an e-learning programme. The programme was conceived and designed to help teachers improve their knowledge as well as teaching skills through the live classroom experience .

The 10-day online Basic Electronics workshop, was conducted with the e-learning platform, A-VIEW developed by Amrita University, run by Mata Amritanandamayi Devi. Deepak Phatak, Professor of IIT Bombay and the mastermind behind the programme, said it was conducted in 38 centres including rural or semi-urban areas like Shirpur and Ichalkaranji in Maharashtra and Kakinada in Andhra Pradesh.

The initiative was funded by National Mission on Education (NME-ICT), Ministry of HRD. A-VIEW platform was also used for 'Ask A Question' programme, the brainchild of Dr. Kannan M. Moudgalya, Professor, IIT Bombay. In this pilot programme, students and experts get connected once a week, online using A-VIEW.

Any college student in India can ask questions on electronics, and they are answered online by senior faculty from IIT Bombay. IIT Bombay has trained around 3850 teachers in four workshops since June 2010 using regular internet connectivity.
